
2015 CQWW DX SSB Contest QRM

DX QRM

40m was a battle zone, with some really good openings on 10m this year...**2E0LJZ**. Licensed 1 year 7 months...**2E0SDV**. 50w homebrew dipole at 10m & 1/2 vertical...**2E0TBT**. MY FIRST TIME ON 40M LOW, HARD WORK!!! BE NO FUN IF IT WAS EASY...**2E0VCC**. 73, thanks! Greetings from Chile...**3G6S**. All six bands open but high absorption on high bands prevented higher number of QSOs. Rates looked more like a CW contest, but at least I've done a full 48 hours and enjoyed WW activity. Ivo, 9A3A/E73A op...**4O3A**. Operated only 12 hrs, bad storm, power outage, rotator broke, Murphy came for a visit. hope to do better next year...**4X6TT**. Wow. Now I understand why people have voice keyers. 73 - Jack...**5R8SV**. Interesting openings occurred like LP early evening opening to JA on 20m. Had a lot of fun giving reports...**6W1SR**. Max output power 5W. I tried QRP category. Thank you all stations. See you next year!...**7L1AVS**. Tnx for a fine contest again. Rig:IC-7600, ANT: Dipole...**7N2UQC**. Licensed EA4GLI Feb 2013 Licensed 8P9EH Sep 2014...**8P9EH**. FT-450 and antennas Quad for 80 and Inv.V for 160 from 20m down...**9A9J**. Lot of QRM, tnx to all for calling me. 2-el Yagi at 34 m and 1.3-kw output power. Congratulations to all...**9A9R**. Assisted by 9W2MLS...**9M2ESM**. License class A since 6 Oct 2015...**9M2HCN**. FT-897, DIPOLE ANT Very fun contest and nice try to build my own antenna using wire...**9M4CKB**. Antennas @ 27m (HF) 2-el Lightning Bolt Quad (LF) Butternut HF2V Propagation came good for the contest after weeks in the doldrums. 10m especially came back to life. Many thanks to the organisers. 73 to all from Borneo...**9M6XRO**. RIG: Yaesu FT-857 100W. ANT: Dipole...**9V50XX**. I am a 10m diehard but enjoyed the busy 40m (sent as logcheck) for the first time. Managed to get 77 QSO on 7Mhz...**9W6EZ**. QSOs were less than our expectation, which was caused by antenna trouble...**AH2R**. DATE FIRST LICENSED FEBRUARY 12TH, 2014. THE NEW LAZY H ANTENNA IS A KEEPER. ICOM 746 PRO, 10M-20M FT LAZY H, 40M SQUARE LOOP, 20M MOXON, 15M MOXON, 80M DIPOLE...**AL4Y**. Rig: IC-7000, Ant: DP, PW: 60W...**BA1SN**. 10M certainly delivered after a long summer in the doldrums. The band was open to everywhere except from here on the western boundary of Asia, the path to NA/Carib was poor with weak sigs. Too many bad signals, excess power, wide and over modulated signals spoil the fun for everyone else...**C4Z**. 80W, 3-el yagi...**CE3SBQ**. 60W, 3-el yagi...**CE3TMM**. TNX to Eugene OH5DA for technical support...**CN2AA**. Used QTH CT1JLZ/OK1RF...**CR5C**. Thanks good propagation on 10!...**CT1IW**. Fantastic contest. I will surely participate next year...**CT7ABE**. RIG: Icom IC-718. ANT: Dipole. PWR: 100W CU next year. 73...**CT7AIX**. Hello dr contestester! Nice contest working with 100 watts and 17m dipole on 15m band see you 73...**DB1VQ**. Every time a nice contest!...**DC1DB**. Nice contest, TNX and see u next year. Vy 73 de Manfred...**DC9ZP**. Many thanks for the nice QSOs even with a QRP station. vy 73 Harald...**DD0VS**. RIG: IC-7700. ANT: Acom 1000 dipole...**DD1JN**. RIG: ICOM IC-7400, ANT: 100-Watt Dentron MT-2000 Spiderbeam, 100-m Longwire UCXLOG...**DF0IA**. Only distributed some points. Elecraft K3, 100w...**DF3IR**. BEST RESULT OF ALL 10 CQWW-Contests in which I participated. Goal achieved: DXCC and WORKED ALL 40 ZONES in one single weekend...**DF7EF**. Thanks for a nice contest! I will be back next year...**DG1RPU**. Thanks for a nice time on air with good condx to North America and Far East. See you next time on air! 73, Bjoern...**DG2BHB**. Super abgeleufen, hervorragend...**DG3FDR**. Nice Contest! 73 de Geri...**DG5MLA**. A few hours with 5 watts, portable on a picnic table close to a lake in Bavaria, a

lot of fun. The first 9 QSO with 1W because of wrong setting at the FT-817. Then 5W through an Inverted-V antenna at 8m, 2*10m long...**DG6TOM**. Wow, that's a show. All bands open, quite good conditions, great DX-OPs — so a "little pistol" like me has the best score since taking part in the CQWW. Great! 73s de Peter...**DH4PSG**. WX cold and moist but condx good, I enjoyed it! Cu next test, 73 de Erwin...**DH9DX**. QRP 5 Watt from FT817 via tuner Z11 to antennas 40m, 20m. Off-center-fed dipole FD3, 21m long, 8m high 20m, 15m, 10m. 2-el, 3-Band-Mini-Yagi MFB23, 11m high...**DJ3GE**. Super condx, hard to choose which band to take when the sun was going down. Work rates on high bands or get DX multies on low bands...**DJ5AN**. RIG: Yaesu FT-991 75W. ANT: Windom FD-4...**DJ6HR**. RIG: Yaesu FT-1000mp. PA: 400 Watt, FD4, FB-DX 506...**DK2AT**. I worked with 100w into my big magnetic loop for a couple of hours only on 80m. 73 Uli...**DK2BJ**. RIG: ICOM IC-7400, AL-80B Fritzel FB-53. ANT: 2x23m dipole...**DK8EY**. This time very bad PLC interference. Not happy!...**DL0GEO**. Surprisingly good conditions and great activity as usual. Thanks for all the QSOs and see you in CW part...**DL1A**. Not fully participated due to heavy cold nice condx around the world, see you in CW part vy 73 de Tom...**DL1ASA**. See us in 2016 :-)...**DL1DF**. 73, Hope to hear you next year again!...**DL1GO**. After returning home on Sunday evening just made 10 Qs on each band (10m was closed at that time, for 160m I currently just have no antenna...**DL3LBA**. Pretty good conditions. I had a lot of fun. First time worked ALL 40 zones...**DL4JLM**. Tnx to my host Steve, DL6LSM, to give me his station and for his great support...**DL4LAM**. RIG: Yaesu FT-450/FC-102. ANT: SteppIR /Loop 168 Meter Umfang...**DL4ZA**. Tnx and see you in CW...**DL5ASK**. RIG: FT-817 ANT: Magnetic loop, on Sunday mainly vert. dipole for 10 m...**DL5EC**. It was a very busy weekend with lots of other obligations, but at least I managed to sneak into the shack for an hour or so to join the fun and enjoy the great conditions on the high bands (especially 10m)! I hope I'll have more time to operate next year!...**DL5XL**. TRX: ICOM 756 pro III. ANT: TA56M, FD4, and Inv V...**DL5ZB**. Nice Contest. First time single-band category and I was suprised. But next contest with better antenna -hi- cu maybe in the CW part...**DL6CT**. Between my 160m SOA with DM7C I worked under my CALL condx...**DL7CX**. RIG: Kenwood TS-50S ANT: Dipole W-8010 Rating. Please only the first 24 hours...**DL7FUA**. Nice contest, see you all next year, 73 Matt!...**DL7VRG**. Very hard job nowadays, I have constant S7 human-made noise level, here in the city...**DL8AAM**. Again nice contest. Hope to see many dx in cw-part. 73, Volker...**DL8AKA**. RIG: Elecraft K3. ANT: TL-922 Vertical...**DL8DBW**. RIG: FT1000MP. ANT: Field Vertical GAP Titan DX...**DL9LF**. Antenna 3-ft. long made it across the Atlantic ...**DL9MFY**. The bands were in surprisingly good shape this year, and I managed to do quite well, but had friends visiting during the last couple of hours, so I didn't manage to crack the 1000 QSOs this time around. RIG: FT-1000MP. PWR: 500W. ANT: Acom 1011, Palstar AT2K, vertical for 160m and 7-band wire log periodic...**DM1CM**. 2015 was from the band conditions great. Thanks to all stations and special "thumbs up" to my family for the great weekend support! Till next year in CQWW 2016! 73 de Stefan...**DM5CQ**. A really hard work on 160m phone. On the end I had a personal score record with a new rig on dm7c. The condx were not the best. Heard some Ws but no answer. ODX was HK. Good activity from far east...**DM7C**. The DX-Hotel was QRV :-)) c u in the next contest...**DM9EE**. GREAT CONTEST, 73!...**DU7OK**. Thank you for another opportunity to play with the best of the world. Even my xyl enjoyed listening...**DU9BX**. Great contest as usual, this year from South

Cooks...**E51EAQ**. Not too bad for only a Butternut vertical antenna...**EA1FDI**. Great contest in 80m. Many tnx for all QSOs 73s...**EA2KB**. RIG: TS570D-G5RV Jr-80w...**EA2WD**. RIG: Yaesu FT7B-Icom 706MKIIG...**EA3DJL**. Nice and fun contest for me this year. See you next year! RIG: Icom IC-706MKII. PWR: 80W ANT1: 10/15/20m ECO AVT vertical ANT2: 40/80m home-made dual band wire dipole...**EA4DXP**. Too busy this weekend, see you next year...**EA4GST**. Nice contest and nice short pile-up, thanks all for QSOs and 73s guys...**EA5GX**. RIG: FT757GX. PWR: 100W. ANT: 2-el yagi...**EA5IIK**. RIG: Icom IC-7000, Multiband GPA...**EA6/DK5IR**. I am not able to play like before, with my Icom dual watch VFO for multipliers. Am I getting older? God, will like to check the SO2R mode one day, he he. Thanks for the great contest. Mike...**EA6SX**. RIG: FT817. ANT: 6m wire from Playa del Ingles, Gran Canaria, holiday-style...**EA8/DL7ULM**. RIG: Kenwood TS-830S. ANT: Dipole Windom. PWR: 70w...**EA8AQV**. Hello everyone I've really enjoyed contesting with such good propagation conditions. I hope to compete in 2016 with high power and make Running. Thanks very much for organizing it. 73 es 44 de Juanjo...**EB3WH**. Thanks to EA8RM for the support. A great friend. Very good competition. Thanks to my company HAMBUY for allowing these pleasures...**ED8O**. Testing new QTH for contest station with provisional antenna. Good US propagation...**EE5M**. We had lot of fun on low power. Rx on the inband antenna. Is easy but it's hard to be heard on 160m...**EF7X**. ANT: Wire-pyramide, 2 Beves. Cond: Nice and interference from other EA8-station...**EF8S**. Ended up being a casual effort due to lack of sleep pre-contest...**EF8U**. Another nice experience with very good propagation conditions. The bands were very crowded. It was very difficult to RUN on 40- and 20-meter band with 100w. Thanks to all participants. Thanks to the organisation who are doing all effort to find the cheaters. 73 Olivier...**E11A**. Amazing how far you can reach with 100W...**E11E**. Propagation really was a positive surprise. Great contest!...**E17JZ**. We didn't really know what to expect from this contest. Conditions have been poor in recent weeks and we weren't quite sure who was available up until shortly before the event. The station had been on air for CQ RTTY, so in theory everything was already tested, but we lost our 80m dipole 3 hours into the contest. Some slight problems with Wintest crashing on Saturday morning, but otherwise all ran well. Apologies for lack of live scores — totally forgot prior to contest and Wintest complained when we went to enable it (network time?) Conditions were okay, certainly not as good as previous years so we had to work harder this year. Nice to see 10m opening although we never achieved peak rates of other years. Thanks to those who travelled — especially Olof and Oleg and we plan to be on for CQWW CW next month. Thanks to all who make M/S such a fun category! John...**E17M**. RIG: YAESU FT-80C. ANT: COLLINEAR 3-EL DIPOL. PWR: 400W...**EK3GM**. This is my check log. I just recognize that logs should be submitted during the week. Since i have problem with eyes/vision i'm not able to do it on time and. I will not participate on CW contest. Serge...**EK4JJ**. RIG: ICOM 706MKII. PWR: 100W...**ER5DX**. Nice propagation where during contest time...**ES1BH**. Really great contest, amazing propagation! It was really nice to hear so many stations from AF continent. RIG: Kenwood TS-2000. ANT: a tribander JP-2000, PWR: <=100W...**ES5TF**. First QSOs for several ops...**ES5YG**. RIG: ICOM 760 PRO. ANT: 5-EL YAGI 10M MONOBAND...**EW2BO**. PWR: 70w. RIG: IC-746PRO...**EW8OG**. RIG: Yaesu FT950. PWR: 100w. ANT: 8-el log periodic (20-10m), Conrad Windom for 160-40m...**F11CS**. First time in this contest just for fun with my FTdx 1200 & 100 watts, Spiderbeam & Dipole 40m Last QSO 25/10/2015 at 1512UTC...**F4ESV**. What a nicely spent weekend! Can't wait for next year!...**F4ETG**. Nice experience with F6KOP radio club...**F4FET**. Contest old school! No RIG assistance, no parrot, no cluster. No more voice at the end contest :) TX/RX: Kenwood TS140s running between 65 to 85 watts. ANT: Wire Dipole on 80m, Rotare

dipole on over bands except 10 M, 7-el Yagi beam...**F4GVZ**. RIG: FT7B. PWR: 40W ANT: Dipole @ 4m up...**F5RVO**. Propagation for Europe very local on Saturday, and wide open on Sunday. Great contest!...**F80OI**. First WWDX SSB from FG4KH. I will try to be better next year...**FG4KH**. I enjoyed working this contest after a period of 10 years off the air! No amplifier, my Alpha is out of order and a fixed yagi (beaming West: 340 degree) Rotor blocked! Quite a challenge! But a lot of fun...**FR5DX**. Our come back to M/S in LP category. Great fun!...**FY5KE**. Poor If antennas limit things, but enjoyed all the contest - great!...**G0CER**. Great contest. Had a great time on 10M band...**G0FPU**. Nice to the bands so busy, accompanied with good conditions. We enjoyed ourselves, and shall be back next year. Thanks for all the Qs. 73 (G3WDL/MØHOM)...**G0GHK**. First chance to operate CQWW for years. I will be back...**G0OZS**. As usual great fun. Very good behavior this year. Went QRP just for the hell of it...**G0W**. FIRST CQWW PHONE FOR A FEW YEARS ONLY DABBLING BUT GREAT FUN!...**G0WAT**. A very enjoyable contest with plenty of activity...**G0WWD**. RIG: IC-756Pro + KW. ANT: E-Zee match ATU + Doublet antenna 25m long. Lots of new countries, Thanks...**G1EIX**. First Attempt...**G1SCT**. My first CQWWDX for some years, it has not changed, still a great contest my age precluded me doing the full 48 hours, I cannot stay awake that long! My thanks to all those who showed great patience with my low power signal...**G3PRI**. Missed most of the contest due to a clash with the AGM of the RAFARS...**G3VAO**. Great condx on 10m for 100W and wire antennas...**G3VDB**. 10M S&p only, difficult condx with 100w and vertical! 73...**G3VYI**. Nice to see 10m open both days...**G3YBO**. Thanks for another enjoyable contest. And thanks to everyone for their good ears, the indoor folded dipole does a good job but is several db down on an outside antenna. Conditions were fairly good but not as good as I expected. The Caribbean in particular was disappointing for me...**G3YRZ**. I went on a cruise half way through Day One of CQWW SSB hence so few QSOs...**G3ZGC**. Conditions pretty good on all bands. 10m still holding up but not as good as last year...**G4ADJ**. Interesting dx cond: 15 better than 10 better than 20. Many signals good quality but some atrocious. Keep non-assisted!...**G4CWH**. Did not have time for the full weekend so entered Classic...**G4DDL**. Good conditions on both days. Pleased to work plenty of stations...**G4FKA**. Thanks for running the contest...**G4HYG**. Good conditions...**G4IUF**. Didn't hear the west coast on 10 but a good selection from central and south america...**G4JFS**. 50+ DXCC with indoor antenna, happy with that...**G4KIU**. Sorry to those I didn't hear while playing with Rx aerial!...**G4L**. As usual enjoyed the contest, disaster struck with rotator stopped working with antenna pointing due north. Must luff over the tower to repair the rotator, yuk! See you all next year...**G4OCO**. An enjoyable contest. Good 10m conditions. RIG: FT1000MP Mk V. ANT: Longwire...**G4OTU**. All QRP using a Xiegu X108G running 5W...**G4SGI**. Surprisingly good condx, enjoyed myself...**G5E**. We decided to set up a multi station to try and introduce club members to contesting. Whilst the score was not brilliant we achieved our aims...**G5N**. Last minute effort from G5W. Good conditions, great category! Many thanks to G3BJ and G4JKS for hosting me once again!...**G5W**. Only able to do one hour due to other commitments...**G6FOP**. JUST A FEW QSOS TO GIVE AWAY SOME POINTS...**G6X**. Restricted hours available and still poor antennas. Enjoyed operating...**G7VTU**. Built a loop the day before the contest, dx results up by 6dB enjoyed contest...**G8AFN**. First time, great fun!...**G8AJM**. Quite enjoyed it for the first time, will be doing it next year...**G8NVX**. Good contest search n pounce...**G8ZRE**. Good contest with some nice DX about but got started late on Saturday. 10m not in as good a shape as last year...**G14SJK**. Another fantastic contest only issue was losing 15m late on the Sunday evening and it was too dark to investigate. Nice to see a Foundation Licence holder willing to have a go at contesting and

glad to say took to it like a duck to water. CME Flare did affect us on the Saturday with conditions not really at their best. Sunday it all came back to normal...**GM2T**. Great conditions, great contest! 73...**GM2V**. A real struggle at times trying to hold a frequency. Not much time on Sunday to really have a go. Much confusion when a EA8 came and sat .2 up on me resulting in chaos with exchanges...**GM7TUD**. Good to see 10m open on both days for the contest...**GM9N**. Target was a new 15m HP Single op record for Wales...**GW4BLE**. Very enjoyable as usual...**GW4EVX**. RIG: Homemade TS9D. PWR: 5w. ANT: YP-3 Yagi...**HAØGK**. Splatter, splatter and splatter. Life is hard with 100W. :-) Thanks for the event...**HA3LN**. RIG: Yaesu FT-2000. ANT: HF6V H/M Copy of Butternut Ant. System, H/M 80/160m Dipole. PWR: AMERITRON AL-811 Amp. Maximum Output 450w...**HA3OU**. Plan longer time to participate but heavy local powerline noise hr...**HA5UA**. RIG: ICOM 756 pro. PWR: 100w. ANT: 3-el yagi GP-s...**HA6ITU**. RIG: FTDX 3000. PWR: 700w. ANT: 1/4-wl GP with 16- x 30-m radials, RX- K9AY...**HA7I**. Big thanks to HA6PX for allowing me to use his equipment. Thanks to everybody who called me. It was my first CQWW SSB where I've worked almost 40 hours...**HA8RT**. We greatly enjoyed having such a fine, international team with 8 members and 4h shifts. RIG: FT 2000 mod., FTDX5000 and Quadra Amps, all worked flawlessly. Condx were also sometimes surprisingly good on 10 and 15m, great runs into NA and Asia. This time again all was field-day style operation (500m altitude, north of Zurich, on a hillside plateau with 150m x 300m opening in the woods, with our 7 and 5.5 KVA generators and container shack on wheels). Two 24-m towers (surplus German Armed Forces) carried our tuned 160m 2- x 30-m dipole, 5 over 5 stack for 20m (upper, top-rotatable), 2-el 40m Yagi (rot.), 40m inverted Vee, 80m inverted Vee, 2- x 20-m up 15m tuned for 10m- "wild" radiation pattern also to AF, SA, 7-el Yagi to NA, 4-el. Yagi to JA. On 15m we used a fixed to NA, 5-el wide spaced Yagi (LX71) and a 20 to 10m Multiband Optibeam, rot., with 3 active el.on 15m, 10m up. Most of the new stack matches/power splitters were homemade as well as the harmonics-stub-filters(e.g. 160 to 80m with over 70 dB) all showed excellent performance. Several PL connectors needed field fixing and new seals! Always good to do early TDR (cable radar) tests. Setting up took 2 days and taking down about one day. Nice contest with lots of fun and satisfaction. Only on 160m and may be 80m, this time, we should have installed our beverages, however too time consuming. Sorry we did not hear all the calling DX/Multis in the QRN...**HB2T**. RIG: Elecraft K3. PWR: 100w. ANT: Force 12 C-4s for 28/21/14 and 7 MHz and Inverted L for 3, 5, and 1.8 MHz...**HB9AA**. 50w output. Antenna 15 m wire on a 1...**HB9AYZ**. Very fun time in this contest and superb propagation. TNX...**HB9FBP**. We had again a lot of fun with friends...**HB9H**. RIG: ICOM-7200. PWR: 100w. ANT: 2-el SteppIR resp. 40/80m Trap-Dipol both antennas 12-m over ground. Condx were not bad, but always a lot of noise (big stations with splatter and other man made noise). I had no time for contest on Sunday. Thanks to all behind. Hope to cu next year 73 de Rudolf...**HB9MXY**. A wire and 800w gave mult to buddies on other bands...**HC2AO**. RIG: IC-765 PROIII, ANT: dipoles, DFH-6 yagi. PWR: 1500w...**HG6ITU**. Great contest but a real fight against a HV QRM all time in the contest. My apologies to the ones I did not copy but hopefully next time will be better QRM level was in the range of 9 db till 25 db over. Amazing conditions in the high bands. God will Cu in the CW LEG...**H13TEJ**. Unable to operate for more than an hour or two this year!...**HSØZDX**. Great contest. All-time high score for me from Thailand...**HSØZHC**. Enjoyed the contest. Part time effort only. Thanks to all for the Qs and to CQ for sponsoring...**HZ1PS**. First time with "high" power, 300w! Hi...**I1DXD**. The antenna for all bands is my 2m antenna mast plus AH-4 automatic tuner!...**I3LGP**. I had problems with my computer. In the 2nd day some QSOs between 0700 and 0800 on 14 MHz are not logged...**I4XNN**. Strong propagation on 10m...**I5KAP**. Terrible propagation, now 59+10dB

and a second later gone, in 10 meters you never know what happen...**IB1W**. Very beautiful contest!...**II1W**. Amusing, as always...**IKØWRB**. The best Contest of the Year! Good propagation on all the bands. 73s de David...**IK7HTB**. I work only on 10m,100 watt and cb antenna...**IK7LMX**. Because my 50th wedding anniversary, I was on the radio only 3 hours. I refer to the next round of November CW 73 John...**IK8ARF**. Beautiful test. RIG: Elecraft KX3 running 10w. ANT: 40 mt vertical and delta loop 15/20 mt. Good test vy loud. Thank you...**IN3UFW**. One more contest from IO4W, still 15m HP assisted as this is my favorite band and some sleeping is possible QSOs but more mults, so the final score is a little more than the previous year. Propagation appeared to be better on Saturday, while on Sunday it had 1-2 hrs of delay, but more mults were on the band. It was a little up & down from IO4W this year, on Sunday in particular, several times I called CQ with no takers for extended periods of time. Happy to have worked all 40 zones. Highlights running USA stations on Sunday afternoon, and the really HUGE pileup of TY4AB. Thanks for QSOs everybody! Ciao, Fabio...**IO4W**. M2 to test a configuration and a growing team, 48 hours of fun, with a lot of spirit of game and friendship...**IO9A**. RIG: FT-1000. PWR: 100w. ANT: VERTICAL AND DIPOLE...**IQ2CU**. RTX: Yaesu FT-1000 Mark V ANT: Tribander 10/15/20 + dipole 40/80 + Morgain 80/160...**IQ3WW**. More than contest a occasion for our members to meet together, two nice days with friends...**IQ5FI**. Very nice contest As every CQWW a lot of fun Bad for no more time...**IR2L**. Very glad to see 10m band in such good conditions. It was a pleasure to work so many country multipliers ever with low band noise level and a surprise to get into USA zone 03. It was a pity to miss any stations in zone 2! Working conditions from my in-town qth linear amplifier 500W out max, antenna Ultrabeam 3 element. Software QARTest 5.8.1. Best 73 and see you soon in CW mode...**IR4B**. Amazing ppropagation. A great going away present from this solar cycle...**IR4X**. TNX TO ALL!...**IR9W**. Excellent start with 110 QSOs/hour. Good propagation with the United States. Very happy with the score, considering the small working conditions. ANT: Dipole 10-15-20. RIG: YAESU FT-897. Activity 18 hours...**IR9Z**. RTX: 2xKenwood TS480. ANT: Wire dipoles for 160m and 80m, rotative dipole for 40m, and triband 20/15/10m...**ISØAML**. Small radio station, a lot of fun!...**ISØFFV**. I operated all the time from the sailboat in which I live. 73!...**IT9PZM**. FT920 OB6-3M...**IT9YAO**. Nice conditions my first contest after getting my license...**IU1FIB**. HI - GREAT CONTEST. WONDERFUL PROPAGATION ON 10 METERS! OPERATING 1 DAY. RIG: IC 756 PROII + SW QARTEST mail...**IV3BCA**. My last participation on CQWW SSB , 2007 1A3A. No antenna for 160, about 32 hours on radio. See you all on CQWW CW. ANDREA...**IV3SKB**. RTX: ICOM IC-756 PROIII. ANT: ULTRABEAM YAGI 3 EL. 6-20mt. TOWER 9 Mt. PWR: 500w through a KENWOOD TL-922...**IWØBCF**. RTX: Elecraft KX3. PWR: 10w. ANT: 5-el homemade...**IW5BT**. Participate from I19K location only to test the setup on 10m, a 2 x MB5 10 stack + another MB5 10. Big result with only 100w! See you in the next contest!...**IW9FRA**. Beautiful contest, good propagation, my new antenna homebrew for the 20m band works very well. Best 73 Sergio...**IZØDXD**. Vertical antenna home-made, kenwood 570 d with power fixed at 4,7 w by internal regulation not modifiable...**IZ1DGG**. Back from a pesky October (seasoned by bad WX and flu) with no boost and backlog to be cleared, I opted for relaxing weekend/contest only. Operation split into 3 parts, for a total of 9 hours. During the night (no QRV I slept blissfully). No score pretensions or set-goal of course, just to be there...**IZ5MOQ**. Beautiful Contest, a must a great fun, great participation and good propagation almost always present for all areas. Shame not to be able to improve the score of last year because the amplifier has abandoned me in the afternoon final but we'll make next year. Thanks to all the stations that I have linked and those who have had the patience to ascoltarmi. 73 de John...**IZ8GUQ**. It is hard to do SSB contest with 100W

+ 2-el Quad...**JAØBJY**. Only hunting a few DXCCs while not serving as an operator of JM1LPN Multi-Single operation...**JA1BPA**. Rig: IC7000M. PWR: QRP-4W. ANT: Long Wire...**JA1POS**. It was a contest after a long time for us however, it was a pleasant contest this time also. And we hoped to continue in the future...**JA1YPA**. RIG: ICOM IC-726. PWR: 100w ANT: 12AVQ 3-Band Vertical...**JA2KKA**. RIG: FT-950M, ANT: 4-EL YAGI, DP ...**JA2YEF**. Condition of the 15m band was very bad...**JA3BBG**. It was hard contest. Called many times but no reply...**JA3IBU**. RIG: IC-706.,PWR: 50w. ANT: Vertical...**JA3JM**. Great contest, picked up some new CALLs...**JA3QOS**. RIG: Icom 756. PWR 50w. ANT: 4-el Yagi 15m high...**JA6EFT**. Condx was very good, especially on the high bands...**JA7BME**. RIG: TS-990S. PWR: 200w. ANT: DP 11m high...**JA7CNS**. This time I entered SOA20m for the first time and used the Internet for the first time ever as single operator, so this was a real first ASSISTED for me, hi. Condx was so-so but unfortunately unexpected snow forced me QRT due to heavy QRN! So I had to QRT or S&P for real strong stations above 59++ noise for many hours. Sometimes used the lower tri-bander for receiving. Although fortunately I broke the JA SOA20m record, I don't think I could win in JA, even JA8 record in vain. Maybe next year! 73s, Akira...**JA8RWU**. I enjoyed the contest. FTDX-5000MP 200W...**JE1CWQ**. I enjoyed the contest. But it was not so good with the 10m condition...**JE1RXJ**. I QRV on 80 single band low power. The condition was not good as a last year...**JE1SPY**. Thank you all stations!...**JF2FIU**. TS-850(50W) Whip on my balcony...**JF2KWM**. Classic-OP & Rig RCVR: 75A4 XMTR HOMEBREW PSN. PWR: 20W. ANT: WHIP UP 35MTRS...**JG3EHD**. Only had limited time the same as usual, but enjoyed the time I had on...**JG5DHX**. I enjoyed the contest...**JQ1COB**. I enjoyed the contest. Thanks for all!...**JR1JCB**. The condition wasn't so good. I enjoyed having QSOs. The maximum output power in the contest was five watts...**JR1NKN**. I participated at Mobile Car Shack. Output power is 30 watts...**JR2AAN**. Conditions were not good. But I enjoyed the contest...**JR3RIU**. FT817ND QRP5W handmade full-size DL...**JR6HMJ**. Thanks for giving me a fun...**JR7DUT**. Made a one-man expedition from Guam. Antennas did not work as expected but enjoyed a contest from another island. Hope I can come back again for better. Thank you for all who called me as well as sponsoring this great event...**KH2/KG2A**. Conditions were not optimum for QRP SSB with a compromise antenna. But it was fun...**KH6CS**. Contest started great until we changed to the low bands. We had s8 to s9+20 noise on 40, 80, and 160 all weekend. Our thanks and apologies to all who wondered why we were asking for repeats — a lot! We need to find it and fix it by CW weekend. Thanks to Alex KH6YY for letting us play with his station. Thanks all for all

the contacts...**KH6J**. I am happy with a good effort. This is all search and pounce, I did not run at all. While conditions were generally good, my dipole was not oriented correctly for Europe and I ended up building and hanging a secondary 20m dipole oriented for working over the pole which worked out well. I still could not break pileups without a lot of patience, but I was able to work through the aurora flutter on Saturday evening. I was very sad in that I could not work PY7ZZ. He had the "ZZZ" of my call but it did not work out. ZZ calls are worth more than a mult to me. And I think that working TC2C is mainly optimism on my part, but we'll see what his log says...**KL2ZZ**. Had a few new ones for Alaska and one all time new one for me...**KL7DG**. Great fun, 30 year old equipment ran great...**KP2XX**. Elecraft KX-3 + R6000 and W3DZZ...**LA1DSA**. Club effort with own members. Two of them on contest for the first time. 10 meter was a surprise. We worked DX hours after sunset. Other bands also in good shape...**LA4C**. Equipment - Elecraft KX3 with a home made vertical antenna QTH - Hatten, Fredrikstadmarka, Norway. Locator JO59LG Shack - Hammock under a tarp in the woods WX - Saturday rainy and windy. Sunday clear and calm. 9-14 C ...**LA5ZTA**. Icom IC-756 PRO III, SM-20 Microphone and Multiband Dipole...**LA6PBA**. Great conditions except AS/OC, great fun. First full time single-op effort. Tired towards the end, but will be repeated!...**LA6VQ**. Good conditions and great fun! Equipment; TS-590 and window antenna...**LA8OKA**. All QSOs were made using my "wire farm antennas": Dipoles for 40- and 20-meter bands at 24 meters from the ground and one loop for 20- and 10-meter bands...**LU1JHF**. I was very license limited, but fun indeed!...**LU8EHR**. IC 7200 ALPHA 91B Antena X7 UP 60 feet...**LU8XW**. Due to some technical problems I had to give up the contest on sunday...**LX7I**. Chased multipliers mostly...**LY2IJ**. Two transceivers failed during one contest — my new record...**LY400**. 93 missed mults this contest. Could not break pileups. Hard to keep running freq with 100W for more than 30 minutes sometimes. Three new temporary towers with monobanders were built for this contest...**LY7Z**. PWR: 90 W. ANT: Wire 15 meters long...**LZ1FJ**. RIG: FT-100D. PWR: 100W. ANT: OB16-3...**LZ2JA**. Short weekend participation just to give others LZ multiplier...**LZ2JE**. Band conditions relatively poor but made up for by activity. Worked 39, 40 zones only missed out on 23 but did hear a couple of stations 100w to a 4-el SteppIR...**MØA**. Band conditions improved just in time! First time in the SOAB HP section. Pleased with the score although there will be many higher — but for 200w and a wire antenna, not bad!...**MØMCV**. More contacts with 5W on 10m than on other bands with 100W!...**MØMPM**. GREAT FUN Conditions good considering the flux was low...**MØPNN**. BAND CONDITIONS INTERESTING, NO FAR EAST STNS...**MØRBE**. Wonderful conditions for our first ever CQWW...**MØREG**. Didn't operate as much as I wanted but good fun all the same...**M1N**. Amplifier blew at 11 a.m. Sunday, rest of contest on just 100w :(...**M2L**. Not much spare time this weekend. Had to work all day Saturday and part of Sunday. Will try to be more organised next year. Great contest but not as good as the CW Leg...**M3C**. A gentle entry — mostly S&P with cluster assistance and only three bands available here...**M3W**. Better conditions than expected, especially on 10m. Thanks for the QSOs from the team at Cambridge University...**M4A**. Better condx on Saturday than Sunday. Local QRM forced QRT early on Sunday...**M5T**. K3, 5-meter wire with ATU (LDG), Win-Test 4.16 I always operate from decent multi-op station for CQWW since 1988 so this year's is completely different experience for me. At least healthy weekend as I enjoyed nice autumn walk both days but really really bored. I need some place for CW next month. Sorry for not answering greetings as I do not have foot switch and using F4 (my call) and F2 (exchange) only. 73 Kazu MØCFW/JK3GAD...**M5Z**. Very pleased to put M6T multi-op back on the air, all new ops apart from two of us. Rebuilding for the future and many thanks to station owner G4BAH. Great to have such good HF conditions, we

all had a really good time the team got on very well together...**M6T**. Wasted my time sticking to top band just wiped out by big stations...**M6Z**. Came on to give some points away and got carried away with the decent conditions. No 160/80 antenna so score is badly compromised...**MM2N**. RIG: ICOM IC-736. PWR: 10W. ANT: MA5B @ 15M AGL...**MM3NRX**. Elecraft K3 and OCFD. Lots of stations from Eastern Europe and Russia with incredibly loud and clear audio on their frequency, but garbled papps and mwapps from them on my frequency, over 4KHz away! This gives them such an unfair advantage, there really is no contest. Great conditions on all bands, ears still recovering from the splatter...**MM3T**. A decidedly part-time effort this year. Shame I didn't have more time...**MM4D**. RIG: Icom 7000. PWR: 400W. ANT: Vertical dipole/horiz dipole/2-el Yagi at 5m high...**MW7X**. 66 yrs old Grandma who LOVES her amateur radio hobby. Icom 745 (1980 made) with 2 solar panels 6-6 volt batteries...**NH7PE**. Had to work both mornings but still, 3052 contacts made for a lot of fun!...**OA4SS**. Much better condx than expected to all continents — super contest!...**OA6Q**. Very good propagation on 10m and on the other bands. I already started with a husky voice due to a bad cold but at the end i could not talk anything, hi. Working conditions are a K3 with 100 watts and a wire antenna under the roof of a multi-story apartment house. Excellent receiver performance of the K3 on all bands especially with overcrowded bands. Most significant insight ... some guys have to learn that it is much more important to listen than to call. I am crazy about the upcoming CQWW CW — looking forward to meet all of you in the contest! 73 Michael...**OE1CIW**. I enjoyed the contest with verticals on my 6th floor balcony...**OE1HHB**. RIG: Kenwood TS-570D. PWR: 100W. ANT: Windom-Antenna...**OE2LRO**. Happy to be able to do at least a M/S low power from new QTH, as station is still not fully established...**OE2S**. It makes fun to be part of the crowd!...**OE2WNL**. I was working from my car with mobile setup. TX/RX:Yaesu FT-857D. ANT: Mobile Antenna Yaesu Atas 120A For this reason i was using my Call OE3MCS/M But i was parked all time during the contest at the same Location or QTH:Vienna GRID:JN88DD Lon: E016 17.476 Lat: N048 09.667 Tnx for the contest, hope to have more time next year!...**OE3MCS**. Transceiver Yaesu Ft 817 ND...**OE3VET**. My inverted L worked well on 10, but not at all on 80 nor 160 m...**OE4WWL**. With three OP and only part-time operation still satisfied with the result. CQWW generates band openings that shouldn't happen. Had fun and will return...**OE5T**. License issued on 16-JAN-2015 TNX to all contestants for the fine QSOs! Setup - screwdriver antenna, FT-857D, 10Ah lead gel battery...**OE6FTE**. Tnx for nice contest. I used FB DXlog, MKII, TS-590 (100w), antennas OB11-3 tribander, wireloop 80/40m and inv. V for 160m. Hope to hear U 2016...**OG3P**. My pre-contest rest was not so successful this time. I was not able to exploit the band conditions and got distracted to DXing mode far too often. I had to take many short breaks as I had a problem with my left leg. It was swelling and aching a lot. Fortunately it was nothing serious. I missed the best 20m opening of the contest to NA as I was sleeping away my stupor. 15m was the money band but the QRM level there was horrendous and at times limited the QSO rates severely. It was very difficult to find a decent spot to run. It was a delight to work DXCC on the higher bands. With a bit more effort it could have been possible also on 40m...**OG6N**. Had fun with a short wire antenna 4m above ground. Thank you sunspots!...**OH0BR**. Less pain with one radio. Felt like 1980's. Real Classic! I did enjoy this one, instead of maximizing the QSO Fun. Classic!...**OH0V**. Great fun, although I was about to go crazy with all the splatter!...**OH0X**. TX antennit 40 ja 80 dipolit, 10-20 biimi X9 , masto 32 m...**OH1BV**. Quite good conditions. It was a quite tight race with Jari, OH8L, until the second night when we once again experienced the difference between OH8 and OH1 U.S. conditions. Especially after the CME impact Jari kept up a steady rate hour after hour while I couldn't get any run going.

The situation improved a bit at my side around 00Z when the conditions peaked up also here in south. Anyway thanks for all QSOs and congrats to Jari for a new OH record!...**OH1F**. Very nice contest indeed...**OH2FHN**. RIG: IC-756 Pro II. PWR: 50 W. ANT: TA-33MW Tribander...**OH2LU**. Nice fun and testing FTDX-3000 same time learning new features. Sorry if audio was tight every now and then as setting mic EQ to own ears suitable level...**OH3OJ**. ANT: OCF dipole, 160m dipole, 40m sloper to east...**OH3WW**. Testing a non-standard windom at low height. Fun to 7 MHz S&P in the last few hours of CQWW SSB after doing 21 MHz first at OH3BCX...**OH5ZA**. Hi all Was very nice propagation in contest weekend. See you next year. 73 de Juha...**OH6GAZ**. Good ears and lots of patience!...**OH8KA**. Many thanks to Jari, OH8WW, for the opportunity to operate his magnificent station and for his hospitality! 73, Olli OH0XX...**OH8WW**. Condx way down from the previous years...**OH9A**. I love this contest. One of my favourites!...**VA3NW**. RIG: ic-703. PWR: 5W. ANT: End fed vertical wire. It never ceas-

es to amaze me what 5W and a long wire can achieve when big antennas are listening on the other end. All QSOs are in eQSL and LoTW...**VA3PCJ**. Had a great time in the 15hrs that I have worked...**VA3TIC**. Very good conditions and a pleasure to operate with a view of the lake. Anybody else see a beaver swimming by and a mink frolicking on the dock while running Europe on 15M? Thought not. :)...**VC3X**. One more DXpedition to Zone 2 behind. At this time I operated as a SOAB Low Power Assisted, conditions on all bands were great and I've enjoyed by NA, SA, and EU pile-ups often. I was impressed by QSO with 5W1SA on 40 meters during morning time through W's pile-up running low power. Thanks to Yuri VE3DZ and VE2CSI Team for help with preparation to DXpedition to Zone 2 and to all who called me during CQWW DX Contest. 73!...**VE2IDX**. Visitors only: Geogette Welling and Henry Jarsyna VA3OV This is the great DX contest, we at VE3DC look forward to doing it every year. We increased our DX Countries this year, even though our QSO count was down slightly. Another great job by our operators, especially since we had 3 newer Hams in the group, learning contesting. Thanks to all that worked us, great DX as well as our North American hams. 73 Rick VE3BK... **VE3DC**. PC crash early Saturday, used Win 10PC for rest!... **VE3PN**. Great contest and conditions...**VE3VGI**. Conditions were generally excellent, except that I missed the awesome 10 meter opening from last year. That hurt since it's the only band I can run on SSB with 5 watts. So no running this year (less than 1% of Qs). QSOs were down and multipliers were up, netting almost exactly the same claimed score as in 2014. As always, I give my compliments to the many ops who spent far too much time pulling me through. Modestly improved low band antennas also helped. I think I'm just about done with QRP SSB. It's too painful, for both me and everyone I call. It can only get worse as the sunspot count declines. Rig KX3/DVR, 5 watts, N1MM+ 10-20 Explorer 14 @ 15m 10-40 Inverted vees (N-S, E-W) @ 14m 80 Tower vertical with short radials 160 hah!...**VE3VN**. Good contest as always. Fantastic to hear the higher bands open. Always great fun!...**VE3ZZ**. Nice to see bands open so long...**VE4YU**. LICENSE DATE JULY 2 2013 I'm a blind ham and haven't got a logging program so I hope this is ok. I'm not sure what my claimed score is, if i manage to earn an award or certificate that'd be neat and surprising...**VE5SDH**. Bands were wide open for us and our noise problem went away for the weekend. We had FUN...**VE6AO**. Great propagation on day 1, lots of one-way on day 2...**VE6ZC**. I had a lot of fun participating in this contest. I gave a couple of great radios a good workout Friday the newly Vintage FT-757GX and a venerable old IC-751A for the duration of the contest. 73 Gerry...**VE7BGP**. Well I spent more time than I thought. Bands were not bad but 10 meters never really opened to Europe. I had to take a DXCC break when TT8AMO was spotted on 20 meter CW. I need TT8 confirmed for Honor Roll so my CW break was a success. Great Contest...**VE7XT**. Great conditions!...**VE8NSD**. Absolutely the best band conditions in years for the entire contest...**VE9FX**. First CQWW SSB, thanks to all for the QSOs...**VK1NS**. Part time effort, having just got off a plane from Huntsville, Alabama...**VK2CZ**. ROOKIE 24th November 2013...**VK2FCOR**. A struggle for Low power and Basic Antennas though Band conditions were good 100W and a wire is a long way from competitive...**VK2NP**. Just a little play. Gave out some numbers. Had fun anyway...**VK2PN**. Only had a short go this year but it appeared to go well for most operators. Intend to participate next year. Would like to thank all those who help to run CQWW contest...**VK3NRW**. Hexbeam at 10m - Yaesu FT897...**VK4BRT**. 10m was wide open everywhere despite propagation forecasts. Very well behaved contest on 10m. My max power was 400 watts into a 2-el triband yagi at 10m...**VK4CL**. Dry Electrical Storms Limited My Operating Time...**VK4EJ**. PWR: 5 watts. Great band conditions 5-el on 10m 4-el on 40m...**VK4FAAS**. PWR: 100W. ANT: 133-Foot Windom Dipole. RIG: Icom IC-718...**VK4HEC**. Another great contest and

learned even more than last year. Built a 20M hex beam from conduit, fishing poles and 4mm cable. Ant. was 4M off the ground turned by hand but worked great. Can't wait for next year. Thank you for the pile up before the end of contest. A great experience...**VK6SMK**. Great to be part of this world wide event. Thanks All...**VK6VAX**. Only had a couple of hours to participate. Heard some great stations but couldn't work them...**VK6WX**. Just joined the contest for a few hours. Hope you like the qso with me...**VR2XMC**. I used Kenwood TS-480 HX 200W with G5RV and Moxon (15M) antennas...**VU2CVS**. RIG: ICOM IC-707. ANT: barefoot with single wire trap diople...**VU2DED**. Thanks to the organizers for all the efforts put in making this a nice contest...**VU2GRM**. A part-time effort on 10M. It was good to hear many VU ops on the contest this year...**VU2LBW**. RIG: FT-200D. ANT: HEX BEAM 20-10M/G5RV Junior FOR 40M. PWR: 150W. A great beginning with a pileup of 50+ Qs at 93/Hr soon turned into a lost day due to an urgent call from the MQTH. My hopes of running a big score was soon lost and changed my plans to go unassisted. Kept an eye on the spots looking for multipliers and working them in between the office work breaks. By the time I closed the Mqth work by 1100Z on Day 1, propagation started playing up and it was an effort to even break into the rx of UAs and the EUs. I also found that I was not hearing enough of the EUs and especially the Scandinavian belt. Also missing was the JAs and BYs. Just 1 JA in 311 Qs! Interesting propagation lessons learnt and need to learn to ensure that the MQTH is out of bounds during contest weekends :) Enjoying and Improving! Will keep rocking!...**VU2MUD**. It's always a fun to work in CQWW contest. I am 16 yes old and this my third CQWW contest. I was first in India and 5th in Asia both years. I operated from a farmhouse. Made all bands antenna. N7XM and VU2NXM helped me with the equipment for contest. Next time will like to use big antennas. I would like if someone helps me with some equipment. I am a rookie. My license Date: 26.06.2013...**VU2NFG**. A great contest as always! One of the best propagations ever in a long time. The NA run was unreal and guys were as loud as 20 to 30 over 9! Highlight was working zone 6 and zone 2 who called me in the pile ups! Missed zone 34 commitments and could operate for a total of 26 hours only. See you all in the next contest!...**VU2PAI**. Nice to participate in the contest with my upgraded callsign...**VU2TO**. First contest...**VU2YVK**. SFI 113 SN091 A 007 K 03 SW 446.5...**VU3KPL**. My first contest using vu2abs Hexbeam and Icom IC 718...**VU3MOA**. First time participating in contest. Tnx to VU2NXM for guiding me. MY LICENS E Date :26.06.2013...**VU3RTL**. Once again, it's tough to deal with propagation at 80N. 10m dead up here and 40m had high noise. Still, we were happy to give out zone 2 from the PEARL Ridge Lab...**VY0VE3KTB**. My 1st CQWW contest...**VY1MAB**. Had a great time this weekend as a new ham participating in this contest!...**WP2SC**. RIG: FT-1000MP+Amplifier. PWR: 400W. ANT: Yagi 5 Elements Monoband...**XE1H**. One of the memorable moments occurred when running in the middle of a gargantuan NA 20M pileup, I briefly asked to stand by to let hearing stations outside NA, a complete silence came, then A71CV was faintly heard and worked nobody interrupted! Hats off guys, many thanks for your sportsmanship and exemplary behavior!...**XE2B**. Very Fun...**XQ1TUW**. Great fun had by all considering 100W max and low dipoles...**XU7AJA**. RIG: FT-817ND. PWR: 5W. ANT: Mobile Whip...**YB0ANN**. Just install on last day a new handmade, dual-band, 80&20M rotary dipole...**YB0UNC**. Nice DX QSO Contest with worldwide Amateur Operators...**YB3JOS**. I can't continuing contest, I had a problem with my antenna...**YC0QR**. In this CQWW, this is my first contest. joint with ORARI - YB3ZBD and BLAZER KEDIRI RAYA I BKR DXC TEAM, good luck to the next contest, 73...**YC3RPW**. RIG: TS2000. PWR: 100W. Thanks for QSOs...**YT7R**. 73...**YU1HFG**. Just to give some points...**YU2M**. Long power outage on weekend put me out of the game hope better luck to see you on the CW part...**YV6BXN**. Nice to test calls and exchange PC voice, up to 289 and 276 QSOs per hour...**YW4D**. Happy to do my little contribution...**YY6CAM**. I have been trying to visit the historic and scenic island of St. Helena for some time it is a three day trip from Ascension Island on the Royal Mail Ship "St Helena." Visits will be easy in 2016, when the new airport opens...**ZD7W**. "ZL PORTABLE K7ST" is NOT "ZL FOUR ST"!...**ZL/K7ST**. We are definitely not a contest type of club. But, we decided to find out what it is like to operate one. We liked it and want more of it. Our only experience before this one was the yearly Josh White field day event which is far removed from any international contesting. We give our thanks to all the hams we made contacts with all over the world. We will be back next year. Contesting will become a vital part of our club's activities...**ZL1AM**. Equipment IC7700, ACOM, OB18-6 Great contest as always, shame about 10m not opening to Europe! All of the equipment worked this year!...**ZL1X**. Always challenging with local noise and limited activity in this region. I was disappointed that there did not appear to be the usual VK activity. Was happy to add some new DX for this band!...**ZL1YE**. Excellent exercise - thanks for setting up...**ZL2BCO**. SO/SB operation and found 40m very busy and noisier than previous years but still enjoyable...**ZL2CC**. Personal commitments made this not a full time event for me. The Rugby world cup matches (SA vs New Zealand - we lost 20-18) and Argentina vs Australia took out quite a bit of time as well as a trip to fetch a friend from the airport in George on Saturday. All in all though quite a reasonable result for me and I was quite surprised at the fairly good conditions, especially on 10m where I had expected the lower sun activity to really make it harder than it was. Used my Icom 736 barefoot with 100 watts and a 2 wavelength centre fed on 40m, 2-el quads at 23 m agl on 20m and 15m and a 5-el yagi at 22m on 10m. My score on 15m was not really that good I felt and I will try to improve my antenna on that band. 80m was a complete washout with very high noise levels and barely discernible signals. Thanks again for a fun filled weekend!...**ZS2NF**. Total operating time 14.5 hours...**ZS6RJ**. Many thanks to the participants and organizers of the WW Contest 2015! Unfortunately, I had three times an interruption of power and I had to rebuild the program. Best 73 es DX!...**ZS9Z**. Operation dedicated to PY5CA SK AUG 26TH...**ZW5B**.

USA QRM

At 82 years I had a good time...**AA4GT**. Fabulous condx with flux of 140...**AA6EE**. Well, we lucked out with 10m wide open during the entire contest...**AB2TC**. I let my tech wife KM4HQL take over when 10m was open and she got hooked!...**AB4LX**. Second contest I ever tried...**AB8AA**. Great to see all the activity and good conditions on 10 meters...**AD8J**. Lic 2/19/15 I am

10 years old! 1st CQWW SSB! Little girl award?...**AE4FH**. First CQWW SSB...**AE4M**. First time in CQWW DX wild time. More DX contacts per hour than I thought was possible from my little station. Barefoot power, 40m doublet 20 foot high antenna. Operated Sunday only for about 9 hours with breaks for chores...**KØBAK**. We thoroughly enjoyed the 2015 CQWW SSB show! The 10 meter QSOs were an unexpected pleasant surprise, following some very poor band conditions not long before the contest. Activity levels on 15, 20, and 40 were likewise busy. Our QSO count on 160 meters was very low perhaps the stormy remnants of Hurricane Patricia were an influence? Thanks to all the great operators around the world for picking out our callsign. See you in 2016!...**KØGEO**. 10 meters was finally open. My first time working this event. I had a lot of fun and am looking forward to next year's event...**K1AUS**. Not full time effort (football) 100% S&P...**K1IX**. My first DX contest, other than giving out points, since installing my little pistol station, however the pistol still needs more ammunition. Need to address my lack of 80 & 160 antennas, and 10m power out was pretty low. I wasn't really able to get a good run going, but S&P was pretty effective for me. Good conditions overall. Although I wasn't able to avoid other commitments during the second day. Still I had a great time, and I hope the score helps the club a little...**K1KA**. Had so much fun on 10 meters, I almost forgot to try the other bands! As a rookie ham, it was quite a thrill to work Hawaii on 10. Will be back next year -- as an Old Timer!...**K1MTD**. 40 mtr ssb is really tough with 4 watts and a vertical antenna!...**K2GMY**. Nice contest, I looked for stations on bands I needed. Lots of fun...**K2HAT**. Condx good enough for openings to most areas, so can't complain too much about it. But they were not good enough to allow me to run 'em. Kept trying on and off, with little success. It may well be quite a few years before running becomes a possibility, at least with this station situation (25-foot-high 4-el yagi, installed just for the contest in this restricted community)...**K2PS**. Attic tribanders & low band dipoles were effective...**K2TER**. GREAT FUN WITH KX3 AND 5 WATTS...**K2YGM**. K3CCR is the club station at the Collington continuing-care retirement community at FM 180W in MD, just east of DC. For the CQWW SSB only N3UM was available to operate, and only for 17.7 hours. Propagation and activity were good on all bands, better than expected on 10 and 15m. Since SFI was only moderate. Did S&P on the low bands and initially on the high, but was able to run EUs on the 3 high bands on the second day. Our inverted V on 40m performed well worked 9K2, A71, and YD. High bands were quite good to the mideast In the very last hour a "Classic" multiplier crawl on 10 and then 15 m. Found 4 new zones and 8 new countries. On 20 m at 23 logged JA in zone 25 for 4 mults in those last 3 minutes. Fun...**K3CCR**. Overall, conditions were pretty good here. Nice to see 10 meters 'wake up' for this one. But, I think that 10 meters is really usable on a lot more days than it gets used because everyone listens and no one talks...**K3JZD**. Band conditions and propagation were very good...**K3SOM**. Glad I had homebrew PA in reserve since Henry 3K blew up 2-1/2 hours before end of contest...**K3TC**. It's always a challenge on 40m SSB when running 5 watts QRP!...**K3TW**. Unexpected good conditions, thanks to everyone for the QSOs...**K3ZJ**. Too many ops don't know how to work a pile up properly...**K4SBZ**. Thanks a lot for the fun. Enjoyed my first CQWW DX contest! Enjoyed the band openings!...**K4VBM**. Part time remote from NC. Had fun!...**K5AUP**. 100W 6-ft. whip Mobile in MS and AL...**K5KLA**. I need more muscle on 40 and 80 meters, but the higher bands were good...**K5XU**. Great Fun. Found several weaknesses in the station...**K5ZO**. Great conditions! A real pleasure...**K6CSL**. This was definitely a 10m contest for me. Plenty of DX, plenty of room to spread out and HEAR each other plenty of stations to work there. Conditions were actually quite nice, especially on 10m and 15m. 20m was in unusual form for me, I was able to work European stations well into the day. As usual, it's nice to hear so many of you when most of the time we

just hear each other in CW/RTTY. For this contest, I was using a Yaesu FT-857D into an Ameritron ALS-500M running a cool 300W. Antennas Butternut HF9V ground-mounted vertical with 83 radials. 10m was AWESOME! So much fun to be had. Thank you for a few new DXCC entities! Thank you for a couple new zones, and thank you for a whole lot of fun! No, I'm usually not a big fan of SSB contests, but I will DEFINITELY see you next year in CQWW SSB 2016!...**K6JEB**. We had a blast operating from Will's station! Conditions were much better than expected, and 10 meters was a big surprise. K3JO did a great job in the overnight on 160 despite marginal to poor conditions. W1VE did most of the running and KE1J concentrated on multipliers. K6ND filled in in-between and provided some much needed relief. K6ND has a superbly engineered station on a not-very-big lot. The 80 and 160 wire 4-Squares did their magic, and the single C31xr and home-brew 2L 40 performed above and beyond the call. We also had a single C31, fixed on Europe, on a 20-ft pole in the woods as our multiplier antenna. All in all, a fun time for a bunch of CW ops doing SSB...**K6ND**. This the best contest of the year. I appreciate all the hard work both the operators and organizers put into it. Thank you all and 73...**K6PGH**. Set a goal of 500 Qs and 500,000 points. Biggest thrill - FR4NT long path...**K6SCA**. First time with CQWW SSB contest. Using 100W to HexBeam...**K6VDU**. Had a terrible fall health wise, so felt good to sit down and play radio. I am slowly getting healed, but it is slow. Thanks for a fun time and all the Qs...**K7ABV**. Was only chasing new countries for my DXCC. Need a better low band antenna...**K7DD**. Don't know why stations saying "QRZ" bugged me so much this year. Why couldn't they just give their #%^&#@ call?...**K7GQ**. Not easy barefoot!...**K7HV**. Bands way up and down in Northwest but always fun!...**K7JAN**. First time submitting log...**K8EEE**. It is tough with verticals! Nice conditions. The T42US group did a great job in the true spirit of ham radio...**K8GL**. NOT MUCH OP. TIME, BUT FUN!...**K8OZ**. First CQWW. Lots of fun!...**K9FRO**. Part time effort. Too many things going on...**K9GY**. Worked the entire contest with my hexbeam 5 ft off the ground on a tripod!...**K9IBM**. Put up a 2-wire 80M beam but vertical had better report. Ended up on 40M instead. Had FUN with just a 40M inverted VEE...**K9IDQ**. Enjoyed seeing the band explode to life post summer doldrums...**K9MK**. Heard more than I could work. Thanks for a good contest. 73...**KA1DBE**. TNX for great contest! Bands in good shape and OPs were very friendly...**KA2VLP**. Great band conditions. Thanks to all the DX stations for the QSOs!...**KA6BIM**. ROOKIE - 08/29/2014...**KA9BBQ**. It was a great weekend to be on the radio! Also out did my last score! See everyone in 2016...**KBØARZ**. Great contest...**KBØPPA**. My first contest running QRO. What a thrill to be able to make contact on the first call running S&P. SB-220 did the job! Family obligations kept me from being on the air more...**KB1GKN**. Greetings all! 10m was in outstanding shape...**KB2HSH**. First attempt at a multi-multi...**KCØYFC**. 1st licensed 2013. KW TS-450SAT into Windom. FN31on...**KC1ACN**. First timer, that was intense!...**KC2ASA**. First time in 18 years I have done this contest...**KD1O**. Thanks for a great contest...**KD4LEM**. Blew the amp 5 hr into the fun, drat! Bands were wonderful for once!...**KD7DCR**. RIG: K3 ANT: 2-El SteppIR...**KE1V**. With only a multiband wire antenna, I had lots of fun, 40, 20, & 15 were the main bands this year with weak 10m opening, lots of S&P and even the big stations didn't seem to have the runs they had last year but maybe we will get one more year out of 10 next year, Great Fun!...**KE2TR**. Beams down tower work. Big difference not using a BEAM! 73...**KE4KMG**. Very glad that 10 meters was wide open! It made all the difference...**KE4VH**. This was my first contest!...**KE7NUQ**. Got BY-China for a New One on Phone...**KE9EX**. Lots of stations with "poor" audio...**KFØIQ**. High bands declining rapidly, sorry to see them go...**KF2O**. 3rd year rookie Licensed 04-26-2013 OK? Garry...**KF5VDX**. Great contest, great signals, I was real happy with propagation, and all the operators were great...**KF7TY**.

ROOKIE 06/23/2015 QRP. RIG: YAESU FT-817. ANT: HOME-MADE 20M DIPOLE. PWR: 5 WATTS...**KG5GMN**. Thank you. Used my new 41-ft multiband vertical antenna and was floored to reach France and Japan today from Washington state...**KG7UET**. Good Band Conditions Friday night. Saturday AC power started cutting on and off at a rate of 3 times per 20 min. At 2 pm it was lights out. So 9 hours and a Mexican meal at the Roadhouse (they had power) later...**KG8CW**. Slow start. Had fun in the early AM both days...**KG9Z**. First time entry...**KI4EBD**. Great contest. Thanks to CQ...**KI6LTC**. Could not get a streak going at all. Hunt and pounce practically all the way. Found my 3/4 WL 40 Mtr sloper not so good apparently. Need 40 Mtr vertical back on Hytower...**KI7M**. Casual contesting...**KJ4CEG**. Fine business...**KJ6LJI**. Lots of fun with crowded bands!...**KK4RV**. This is my first Contest...**KK6IVX**. Had fun, despite a shorted feed-line...**KK6L**. First contest. Lot of fun...**KK6PVS**. RADIO IS A STOCK YAESU FT-817ND. MAXIMUM POWER OUTPUT WAS UNDER 4 WATTS...**KK7VL**. My first contest, I had fun and cannot wait until the next!...**KM4HQL**. Operating conditions RCI-2950 with homemade half-wave wire vertical dipole...**KM4HVE**. Band conditions seem to be pretty good with 10 meters being open the last week or so...**KM6JD**. Enjoyed working a number of JAs...**KR1A**. Never know when a rare needed band entity might show up in a contest and be workable. Saw C3 stations spotted at other times when no contest but could never hear them. C37N had a great signal here, real 59! Tnx for being there!...**KS7T**. When the 1st guy you work is in zone 29, you know it'll be a great weekend!...**KU2M**. The sun shone favorable on the masses this year. Amazing conditions for heading into a 2nd Maunder Minimum. Conflicts of many proportions keep me from a Maximum Effort. I hope I did not miss the best conditions for my lifetime. B1Z on 20m with wires in trees was a treat...**KU4V**. First licensed Dec 20, 2012 Very satisfying contest, was only able to participate a few hours, but 20m was a feeding frenzy! Running an ancient Yaesu 747, feeding direct to a 40m off-center dipole dangling at 12m in the front yard...**KV4LV**. Only had a few hours on Saturday to operate...**KV6O**. My best DX WW ever. 10 & 15 meters were the best from North Carolina, especially 15. I was amazed at the number of stations on the air. QRM made it difficult to separate some signals. My little TS-430 & G5RV did pretty well all considered. Made it a challenge at times, but that is the fun of it, right? I find that I am not quite as quick at 76 than I was in my earlier years. What a great hobby to have for retirement...**N0KOE**. Thank you! I picked up a few new countries and a few more states...**N0LD**. Only reason for assisted is for 160M Hawaii SSB search. Rained Friday night and part of Saturday morning. Band conditions were good but I need to better 80M antennas. Focus low band more in following years for cycle. Not a lot of Zone 18 out there...**N0ODK**. Great openings to India and Middle East...**N0UU**. It sure got interesting in the last hour of the contest when stations in Asia could be copied in W1 land...**N1BCL**. This was a 100% S&P effort with limited hours. Glad 10M opened up. I spent most of my time on 10/15/20. Very tough on the ears compared to CW contesting. Station: TenTec Omni 7 @ 100W, Heil ProSet Plus with HC4 element Antennas: 4 element Triband yagi at 30ft, 80/40 dipoles, 160M inverted L Computer: Win 7 PC running N1MM Highlights: Breaking pileups on the first try (that DX setting on the Heil HC4 really works) Working WL7E on 20M for a double mult with 2 minutes to go Thanks for the QSOs. 73 Rick...**N1DC**. First time recording. There look to be a few cut out sections. Will continue to improve this capability...**N1UR**. My 1st SSB contest I've ever submitted a log for. Had a great time!...**N2IIE**. Not as much time as I would have liked but bands were nice and busy...**N2IVN**. Amp blew right before test. Tough with just wires and low power...**N3KF**. GREAT CONTEST...**N3MWQ**. Looking forward to the CW contest next month!...**N3RS**. Great band conditions this year...**N4DCT**. Worked 101 countries on 10M running only 500w to a 3-el yagi!...**N4QS**.

Operating from Yellow Spring, WV...**N4RA**. S0S was ATNO - thanks!...**N4TZ**. Part time, good conditions...**N5KF**. Always Fun! Thanks to all for the QSOs!...**N5RZ**. Weather was perfect for this contest. Steady rain with NO lightning made for exceptionally quiet listening all weekend. Mostly S/P and a few run times, operated /ASSISTED and the band map keep me busy. Only one main antenna so hard to try and run much. It has been right at a year since the SteppIR DB18E was placed on the tower and it finally got the workout it needed. 73 es thanks for QSOs...**N5XJ**. All stations found by operators. No spotting used. Very bad power line noise on all bands...**N6AA**. Conditions were mixed. I could not hear anything on 80. Asia on 20 was lots of fun. Zones 17-28 were worked except for 22. I could not crack VU2PAI despite hearing him both days. Great to have 10 hanging in despite lower solar numbers. Thanks for all the QSOs...**N6AN**. Great conditions, especially 10. Hard to run, mostly hunt and peck...**N6AR**. 4100' from the North Cascades G5RV antenna...**N6LB**. 4-el Yagi for 20 on a van...**N6MI**. It's nice to hear people say "Hi Bob" when I call in. I just wish I could remember their names too...**N6TV**. This was our first attempt running a multi-op single transceiver station...**N6YG**. Kenwood TS-950SD with 99 watts output, Heil BM-10 Headset, and home brew G5RV up 50 feet, running N-S at 6,053 feet elevation from Laramie County, Wyoming. Great conditions. Nice to see 10 Meters open! Worked most of the DX with one or two calls. Another "Boy and his Wire Adventure" for this 58 year old "kid," from my Apt. QTH. Thanks to all who heard and worked me...**N7MZW**. I had fun. See you next year...**N7VZU**. Great conditions on 15m! Pre-contest goals were accomplished beyond my belief! Wanted 100 Countries and 35 zones with 500 QSOs. Score speaks for itself!...**N8DE**. Sick but found some countries that I needed for DXCC...**N8FE**. Great fun time and the bands were really good...**N8MWK**. I had a slow start early, but went gang busters during the second day...**N8NYI**. GREAT CONTEST WEEKEND WITH LOTS OF DX CONTACTS GREAT BAND OPENINGS DURING THIS CONTEST EXCELLENT PROPAGATION ON 20 40 AND 15 METERS...**N8SK**. Busy weekend, sorry I had to miss the good conditions...**N8VW**. Rig: Yaesu FT-817. PWR: 5W 160-10...**N8XA**. Go MRRC GO!...**N8YXR**. Only got to spend a few hours this year but I had lots of fun as always...**N8ZFM**. Decent conditions. Working mainly to fill DXCC on 40 and 80m. Looking forward to CQWW CW...**N9IO**. Got on from father-in-law KA0UAX's shack while visiting in ND for a family event. Great to see the bands not so dead!...**N9KY**. What a contest! 80 and 160 were the only real disappointments. Asian openings fantastic! WW always brings out the activity...**N9RV**. SO2R Dual Yaesu FT950, Monoband Antennas...**NC7M**. A part-time effort. Conditions seemed relatively good...**ND0C**. Could not do a full time effort due to work but got to operate 19 hours. Nice to be able to count my score with the Florida Contest Group for the first time! Thanks to CQWW for expanding the circle. I live in Florida and couldn't be counted with the FCG in the past. Now if we can get the stubborn ARRL to do the same thing that would be great!...**NF4A**. Thanks CQ for Great Contest...**NJ9U**. Small amount of operating is better than no operating...**NK5G**. Nice contest, good condx, and lots of fun. THANK YOU!...**NK7Z**. All S&P, making points for the club. There was some really interesting prop Saturday evening around 9 and a few others really well — easily S5 — and I called them for a long time, but was never able to raise them. I was essentially knocked off of 160M and 75M due to a hellacious power line noise issue...**NN4X**. Happily surprised that condx were so good after several weeks of doldrums...**NN6DX**. I traveled on Friday and got to the shack right at the bell. Spent another half-hour getting setup. Not that it was urgent, 75m Phone had only local ragchewers and nets for the first several hours. With limited time and interest, I chose the category that the CQWW SSB Records page shows the USA had "no entry" so my entry would have a chance at the USA Record! Finally by 04z each night I could work a few Canadians, Thanks! Midnight

and sunrise allowed me to work Hawaii, Alaska, and Japan. And well, that's all I could work 80m QRP SSB. I could hear plenty of DX, but unless they were S9 and no pileup I couldn't get through. That's quite normal for QRP SSB NN7SS (op K6UFO) 80m Kenwood TS-590s at 5 watts SDR-IQ receiver and Spectravue software panadapter...**NN7SS**. For me, an unusual foray into the world of SSB. It will take much more practice for my ears to be able to decipher call signs amid all the QRM. A good antenna would also help. Here are the results of my modest effort, rife, I am sure, with errors...**NO2D**. Operated the first day as multi K4TCG. After coming back, operated from home to see the difference...**NO9E**. Thanks to all who worked behind the scenes...**NT4Z**. A lot of QRM. Just can't do too much with a G5RV! Had fun!...**NYØT**. Contests are great for identifying station improvements...**NZ3O**. Need better time management and prep next year...**WØJM**. Great band conditions. My goal was a part time operation and logging 100 Qs. Mission accomplished. Had to spend time with XYL who is recovering from a broken hip. The time spent was fun...**WØRAA**. It was a great contest though I did well but I guess others did well too nice to see the bands open...**WØYJT**. Casual operation, great conditions phone is NOT fun for me...**W1FJ**. Only a check log - I wasn't feeling it this morning, had some local QRM which was S7 noise floor so gave up after an hour or so of not being able to hear anything. Got to figure out a different approach to this. Tom...**W1TEF**. Good to be back on the air from our new house...**W1WEF**. Another "all wire" effort, G5RV and 160m dipole!...**W2CCC**. Very busy weekend but got in few hours to play...**W2HCB**. 100 watts and a wire antenna was all I needed to have fun and keep up a good rate!...**W3BC**. OCF @40', 15m inv V 25'. All S&P...**W3CF**. First contest with new Kenwood TS990...**W3GK**. Thanks for the Contest!...**W3ZAP**. Limited time to operate, unlimited fun!...**W4DHT**. This was a test for operating from a remote location...**W4PFM**. ft1000mk5>SB220^carolina windom 62' NE/SW...**W4QNW**. THIS IS MY FIRST CQ SSB CONTEST! 100 WATTS AND A WIRE...**W5KAL**. Part-time effort, much more of a cw guy. Thanks to John K4FT for coming over and helping out. Antenna work from over the summer seems to be paying off. Looking forward to the contest season this year for sure as I am finally getting the station closer to the goals I have. Thanks to all for the Qs! 73 Bryan...**W5MX**. Operators who speak so fast they cannot be understood discourage many callers...**W5THT**. mult.problems with equip. decided to quit early 73 Pat...**W5WMU**. My 1st contest from the US. Just a few contacts, but it was fun! 73...**W6EUH**. Last week of work so minimal effort (working Saturday & Sunday). About 2.7 hours...**W6NS**. Only part time 10 & 15m effort. But still had fun...**W6SR**. Fun Contest

as Always...**W7CAR**. About a +/- 24 Hour Effort for me...**W7DO**. Work commitments over the weekend ended our annual M/S effort...**W7VJ**. Thanks for all the Qs and 73 Tom...**W7WHY**. TR-4C and 14AVQ still cuts the mustard...**W8GOC**. Saturday was "Fun, Fun, Fun till my wife took the radio away!" Not really, we went to see the Beach Boys in concert and it took a good part of the day and a short period on Sunday to recover...**W8KNO**. Awesome Contest, Awesome Conditions...**W8TAH**. I am back into amateur radio after a 36 year break and this is my very first contest! Enjoyed the heck out of it and will get a proper logging program so I don't have to transcribe the next time...**W8TJM**. I had fun running the whole contest with vintage Collins Radio equipment...**W9GL**. This modest effort was my personal best for a single op entry...**W9GT**. Conditions not as bad as expected and a lot of activity from rare zones...**W9RE**. I thought the bands were in good shape. Missed 3 zones only...**W9XX**. Good to be an amateur radio op working the contest - say no more!...**W9YK**. Goal 100/40 got 82/27 but had fun...**WAØKDS**. Great condx. All bands were wide open and really hopping...**WA2BFW**. I missed the first 5 hours but got a pretty good score at the end...**WA6KHK**. Gave up after computer and network problems...**WA6POZ**. Operated remote from Tokyo Japan...**WA6URY**. TS-440S and a Double Zepp all bands...**WA8AXF**. Fun contest, noisy bands both days... **WA8LE**. THANKS TO N4GYN FOR USE OF HIS STATION USING REMOTEHAMS.COM REMOTE CONTROL...**WB2RIS**. 268' wire loop at 35', N1MM logging software, Heil Pro Headset. 73! Steve...**WB4OMM**. TS430S, Alpha 87A, 120 foot vertical + radials...**WB4WXE**. Had family in from out of town. Just ran the bands here and there...**WB6BFG**. I was forced to use N1MM and I barely got things working. But forcing myself into doing the contest helped me (a person that really likes Writelog) get to understand how N1MM works...**WB6CZG**. Made some great early morning contacts on 40 meters...**WB9KPT**. Great time...**WB9LRK**. 5 watts, a dipole, and a vertical - what a blast!...**WFØT**. Very crowded! My hunt and peck score tells it all. Great conditions here in NC...**WJ2D**. 40m band only (single band ROOKIE entrant) April 5, 2013 license grant...**WK9U**. QRP is tough in this contest. Still had fun!...**WN4AFP**. Nice 10M conditions. You could really see grey line propagation...**WO8USA**. I was to be a part of a multi-OP operation running as NX6T. All operators cancelled so I entered with my own call sign. Unlike previous weekends where 10 & 15 meters were lacking, both bands were open way past their expected closing time. For me 40-meters was quite a disappointment...**WQ6X**. I operated this contest mobile while in motion...**WX4TV**. Great openings on 10M!...**WY7KY**.
