
2017 CQWW DX SSB Contest QRM

DX QRM

Licensed on 11/19/16...**2E0EFS**. LICENCED SINCE MARCH 2017...**2E0IQW**. Really really tough to go against the qrm the bands where crazy busy...**2E0LJZ**. Could only work the afternoon on Saturday but enjoyed it all the same...**2E0LYF**. First CQWWSSB contest...**2E0MGP**. Totally enjoyed the contest and my best score to date...**2E0VCC**. First serious entry to this contest. I'm using a new antenna system: a long wire into an SGC 230 tuner. 50W power output only. A real scrappy contest, bands only really open to Europe from my QTH...**2E1BRT**. Worked 1 contact 10W using 2nd call. Submitting so N1UR doesn't get penalty...**2E1EPQ**. Check log only...**3B8CW**. Thanks for the contest. Prefix 4E is a challenge...**4E1A**. TNX 73!...**4L7AA**. Very good conditions. I had a lot of problems with the station. RF inside. Listen very well to all but they did not listen to me. With 100W impossible. Very sick the second night and Sunday I could no longer speak. 40 degrees of fever. I'm so sorry. I tried but I did not get lucky. See you in 2018...**4X0T**. Conditions were better than expected...**4X4LF**. Checklog...**5P9R**. Note: Possible log entry errors made on which band the QSO was made, in particular 40M QSO entries may have been on another band. Apologies to anyone affected...**6W1SU**. Used QTH of Josh Walker, 6Y5WJ...**6Y4T**. I enjoyed the contest...**7K1MAG**. I enjoyed the contest...**7L1DST**. Thank you very much for very nice contest...**7L3SQL**. I enjoyed the good contest. Tnx for a fine contest again. IC-7600 (100W), Dipole (20mH)...**7N2UQC**. I enjoyed the contest...**7N4GIB**. I enjoyed the contest...**7N4JXR**. ANT: 10&15M: 14mH 4-el, 40M: 14mH DIP, 80M: 13mH DIP RIG: FT-991 PWR: 50W...**8J2Y**. Antenna disaster in high winds. Used all verticals...**8P2K**. CQ Worldwide DX Contest SSB...**9A1EA**. Unexpectedly good propagation on 10M on Saturday. Unfortunately serious contest ended before the contest started for me, the rotor on OB11-3 was broken and antenna stucked to south! Better luck next time...**9A2EU**. Used 5W into 4-el quad. Great opening to US. See you in CQWW CW! 73...**9A4AA**. Wishing many dx and good propagations...**9A4GD**. Thanx to everyone for QSO, VY 73!...**9A6DDA**. We were operating in accordance with Contest rules and HAM spirit...**9A6V**. NO HAVE MUCH TIME, BUT I LIKE TO PARTICIPATE TOO. MY KEYBOARD STUCK, KEEP TRYING...**9M4CKB**. Yaesu FT-920 & FT-1000MP with Quadra Linear @ 400W Ants @ 27m (HF) 2-el Lightning Bolt Quad (LF) Butternut HF2V. Many thanks to the organisers. 73 to all from Borneo...**9M6XRO**. Newly Licensed in Oct. 2017...**9V1OW**. FT-897 100W DP DP...**9V1XX**. 2015...**9W2JMW**. 22/02/2016...**9W2LRN**. 15.08.2016...**9W2SAF**. 2015-08-11...**9W2VPZ**. PC had hard disk problem the first night. Luckily I managed to recover it...**9W6EZ**. RADIO FT-857D...**9W6ZUL**. SO HP ALL...**A61QQ**. FIRST TIME ON 20M SOSB LOW!...**A65CR**. The high bands condx was better than expected, however low bands condx was much worse than expected. Please rotate your beam to the western Pacific frequently...**AH2R**. FIRST LICENSE 01 MAY 2017...**AT2FI**. Spent some time checking out the activity, all S&P. Ant: 40M dipole...**AT5X**. TKS NICE CONTEST, CU AGN 73...**BA4SD**. OP BA9BF/6 NANZHIX-UE...**BA9BF**. 10m high GP + LDG tuner. Exciting...**BG5TOX**. 2015/07/28...**BG9NJY**. Licensed in April 2017...**BI4WOP**. I enjoyed the contest...**BW/JP3PZG**. Only did a few hours, enjoyed better than expected condx...**C44C**. Fantastic propagation...**CB3LR**. difcil propagacion para Sud America. 73 y Dxs...**CE5JZO**. 100% S&P, but still good fun...**CG1JS**. Not bad con-

sidering the lack of sunspots...**CG6LB**. 1 hour at the end of the contest. Thanks for the contacts, and good luck!...**CG7CXZ**. LIC: 43478 Feb/26/2015...**CM8NMN**. Too many issues before and during the contest. Congrats to EF8R team with great result! Thanks for all who calling and spotting us. See you in the CW part...**CN2AA**. See 3830...**CN2R**. Lot of FUN! We'll be back next year...**CR5SSB**. Band was full, was difficult to keep frequency clear. Gave up on looking for multipliers on 2nd VFO on the first day, almost made me lose frequency...**CR6T**. 22.05.2015...**CR7AMH**. 2nd sent, error on year...**CT1APN**. The "Crash" of my AT-50 was amazing!...**CT5GOJ**. RIG Icom IC-7300 ANT Dipole PWR 100W...**CT7AIX**. Just played around a little bit...**DA0AA**. Lizenz seit 21.10.2015...**DB1BW**. Nice contest, TNX and see u next year. Vy 73 de Manfred...**DC9ZP**. Rookie, first licensed April 2016...**DD6DR**. This was great fun for us! We even attracted some guys for contesting, so they joynd our operation and did some QSOs or were just listening. Unfortunately they made some mistakes so we marked the QSOs with "X-QSO" – hopefully it works. Thanks for this nice contest!...**DF0SAX**. 2015...**DF1MB**. License since 2017/05/22...**DF2GL**. Rig: Eecraft K3 & vertical antenna...**DF3OL**. 16.3.2016...**DF4JM**. Conditions OK. Twenty five hours fun. Till next year! 73, Uwe...**DF5BM**. This time I entered low power using K3 +100W, 3-el. Mini + dipole. I hoped to get more distant DX in the log than with QRP, but that was not the case really, although 10 and 15 were quite open...**DF5RF**. Sind nicht alle Verbindungen, habe am Contest nicht aktiv teilgenommen...**DF6QP**. WWDX17...**DF9RD**. TRX Kenwood TS-2000, Antenna Dipol MANY THANKS TO THE ORGANISERS AND 73...**DG1RPU**. Very nice contacts...**DG1VR**. Thank you for the nice time on air. Good conditions. Nice contacts. Hope to meet you again next year...**DG2BHB**. Wkd only with low (8m high) inv v Multiband Dipol. PWR=10-50W. Many tnx all for your patience!...**DG3FK**. This is the best contest of the world. Tnx to all for calling me. Vy 73 de Geri...**DG5MLA**. Kenwood 570D, FB 53 Fritzel Beam for 10/15/20/40M, W3DZZ for 80M...**DG5OBB**. PC war defekt...**DG7DBR**. Part time entry, testing the remote station...**DJ2QV**. TS130v + TL120 + AT130 MFB23 / FD3...**DJ3GE**. Strange propagation, but lot of fun as always. Nice to meet the friends on the bands agn HPE CU NEXT YEAR IN WRTC...**DJ5AN**. It is my best result on 15M...**DJ6TK**. OFFTIME: 2017-10-28 1000 2017-10-28 1445 OFFTIME: 2017-10-28 1800 2017-10-28 2100 OFFTIME: 2017-10-28 2200 2017-10-29 0820...**DJ7WG**. ICOM IC-7800, ACOM 2000A, 80M Monoband Dipol Inv. V @18m...**DK0AE**. ONLY CHECKLOG...**DK3GG**. As usual, major fall storm. High gusts. Antennas down. Just a 40M Inverted...**DK5D**. Every day sees humanity more victorious in the struggle with space and time. Guglielmo Marconi Kenwood TS50s 10W, 40m Longwire. Only storm Herwart impacted and disabled the station for some hours when he added a few lightnings. 73 Hans...**DK5OCE**. License 12.12.2014...**DK6MP**. LISENCE 2013-06-08...**DK9MOS**. Thanks for organising!...**DL0ESA**. Ground-plane Antenna R 7 down in Storm, Contest finish...**DL0GH**. CHECKLOG...**DL0RO**. Unfortunately my antenna became a victim of the storm...**DL1BDU**. Contest was great fun, log conversion in Cabrillo difficult...**DL1MEV**. Could only have a few QSOs. Some ops have strange ways of working...**DL1ONI**. Ufb conds!...**DL1RPR**. SO Single-Band (15M)...**DL1SVA**. Icom 703 plus, G5RV and GP, Mikrofon SM-20...**DL2DWP**. Some PC crashes...**DL2GMI**. Good activity in Europe on 160M...**DL2RZG**. Vy733 mny tx fer contest...**DL3KDP**. It was fun. No 10M

Conditions...**DL4JLM**. Check log...**DL4LAM**. Yaesu FT-DX3000 / SteppIR / Loop 139m Umfang...**DL4ZA**. License since December 2014...**DL5LB**. TRX ICOM 756 pro III...**DL5ZB**. CU in the next PSK / SSB / RTTY Contest...**DL6DJ**. Good condx. CU agn in cw part...**DL7CX**. Did it while on holiday with the family. 100W 40m Wire. Icom IC 7200A Had Fun...**DL7ED**. 21.12.2016...**DL7LL**. Rookie 2016...**DL7NV**. Fun little sparetime-activity! 73, Andi...**DL7ZZ**. SINGLE OPERATOR ROOKIE (HIGH POWER ASSISTED) FIRST LICENSED IN OCT. 2015...**DL8BFV**. Little Loc, but better as nothing!...**DL8OAZ**. Rookie License Nov. 2015...**DL9CP**. FT1000MP Field Vertical GAP Titan DX...**DL9LF**. Year of License MAY / 09 / 2016...**DM1MA**. Lizenz 05/2016...**DM3BN**. ROOKIE...**DM4DS**. 15 and 10M this year was very bad...**DM6HK**. I have not logged the received zones...**DM7MRE**. 06.12.2014 ROOKIE...**DO2HEY**. The Best Contest - ever ever ever...**DO4TP**. SOTA, 73...**DO5TMM**. 1. Licence 11/05/2017...**DO7DOC**. Rookie license since 05/2015...**DO7EE**. TRX antenna...**DO7ES**. I had a lot of fun at the contest...**DO8YX**. Rookie 2015...**DO9CW**. Contesting with a very stormy night. For safety reasons we had to lower our antennas for almost 12 hours. Finally we are happy with our result. Great team and great weekend...**DP6T**. Only part time participation: Had to crank the antennas down due to severe storm in northern Germany from saturday evening until sunday late morning local time...**DQ1P**. Thank you...**DU1AVC**. Great time was had by all...**DU1HR**. HAPPY TO WORK A SMALL NUMBER OF STATIONS! INVERTED V @ 20mh USING 100W...**DU3/W6QT**. 73...**DU7HF**. 20 March 2015 license # AT-NC 0978-15...**DV1YAI**. OCTOBER 9 2017...**DZ1PUP**. 14MHz was quite opened toward Pacific area but not toward EU...**E2ONGF**. Checklog...**E74SL**. Poor propagation and not much time...**EA1BP**. Mono-operator Asistido Baja Potencia CQWW SSB...**EA1IC**. My RADIO LICENCE IS OF 15-09-2015...**EA1ITX**. It was a great contest at home using Testing N1MM under Xubuntu was great...**EA2CCG**. ICOM 7600 dipolo DX-B Alpha Delta o hy gain avq 14 + expert 1k...**EA2DDE**. Thanks to all operators!...**EA2GM**. CQWW SSB...**EA2XG**. I had a lot of fun. Thanks to all. Till next edition!...**EA3BRL**. Republic of Catalonia. New DXCC entity...**EA3FHP**. CQWW SSB...**EA3HWC**. 22/12/16...**EA3IAA**. Nice weekend with this fun contest! See you next year! RIG: Icom IC-706 MKII. PWR: 80W. ANT1: 10/15/20M-ECO AVT vertical. ANT2: 40/80M homemade dual band wire dipole...**EA4DXP**. CQWW SSB...**EA4GOK**. ROOKIE 3-FEBRUARY 2016...**EA4GUU**. ROOKIE 16 JUNE 17...**EA4GYR**. CQWW SSB...**EA4LG**. Best 73 de David...**EA4SG**. EL CONTACTO No15 NO HA PODIDO INCLUIRSE POR NO DEJAR EL PROGRAMA - Z61DX 21Mhz. UTC-16:14 28-X-2017...**EA5DIT**. TS480, 100W, Vertical 1/4 wave 2 sloping radials, El Trampoli beach, Denia...**EA5GVZ**. Antena Ground Plane 100W kenwood ts 570d, Lic 2014...**EA5IJG**. GRID LOC im97lx...**EA5UJ**. Icom IC-7000, AT 7000 Tuner, Multiband GPA - 6.3m long, 5m high...**EA6/DK5IR**. LICENSE 9 JANUARY 2017. CERTIFICATE: YES. LOCATION: JM19LI...**EA6AMM**. Not many spare time unfortunately so I decided to do something really different (QRP on TB). This is the most difficult category you can ever imagine. The challenge was how far can I reach with just 4W and inv. V. I can only get 1 of around 20 heard and called several times, and that was after repeating my callsign at least 10 times. Unfortunately a big QRN from neighbour machine oblided me to QRT. 73s All...**EA6SX**. Real holliday station. Antenna was inside a small balcony!...**EA7/OG55W**. Even under the very low conditions the contest was pure fun. Looking forward to next year...**EA8/DJ6HL**. La Palma Island Canary RIG: KX3 / 10W...**EA8/DL4KCA**. CHECKLOG...**EA8/OH1RY**. After many years I returned to participate in the CQWW SSB, I could not devote as

much time as I wanted, but I was able to give zone 33 to many participants. 73 & DXs Luciano...**EA8AM**. KENWOOD TS-830S DIPOLE WINDOM 80W...**EA8AQV**. LICENCE ACTIVE 29/01/2016...**EA8DET**. Yaesu FT-1000 MP M V and Dipole...**EA8OG**. Only works 10 hours with a dipole very high propagation early next year...**EB1EWE**. Thanks for the fun to everybody. The new 4 square for 80M turned out a killer array, it paid off all the Imanol's efforts. Thanks to Filipe CT1ILT for the RX and 80M 4 sqr antennas digital desktop control boxes, to Pablo EA4TX for the ARS rotor control boxes, to HAMBURY (EC5AN) for the high bands RX antenna and to Eider & Imanol (EC2DX) for hosting this gang of crazy ops. See you all in the CW part. 73...**EC2DX**. Thanks to all OM who listened and answered my QRP whispers...**EC4AA**. KENWOOD TS 2000 ANT. DIPOLE RIGID...**EC8AAQ**. Big fun! Crowded bands, no so bad condx...**ED3T**. Thanks for the QSO to all the partners...**ED9E**. 73 from the EE5T Team...**EE5T**. A local electric QRM bocked me for many hours...**EF6T**. As usual and since 10 years, I travelled from Brussels to County Tipperary to erect my antenna park on top of a windy hill. This year, just a week after Ophelia storm, the weather was better and I enjoyed spending 4 days in the fields to raise a lighter antenna park than usual as my antenna trailer was still stuck in the mud due to the past weather conditions. The fields were so wet than each step was followed by a splash and sometimes I've had cow mud up to my socks. Just after my arrival in Ireland, my PC crashed and I had to buy a new one but here the keyboards are QWERTY and not AZERTY, what an additional challenge also but the main point is that I lost all my usual software. During the contest, I experienced a decrease of sun activity as well as a decrease of "Tropical" activity. I am sure that we are enjoying the 10 last years of good ham radio contest and I plan in the short future to visit engineering universities and high schools to motivate students to join us. 73 from Olivier...**EI1A**. Amazing conditions. Working into PY with 5W easy. Must try QRP again...**EI1E**. CQWW is like a fine wine or a dose of the flu - it is different every time! Was mostly wine this time. Also, great to hear plenty of new voices...**EI4GNB**. 100W into end fed antenna from IO51tu. Licenced since 25 June 2015...**EI5HZB**. SD worked great, besides PC crashing!...**EI5KG**. Great contest...**EI6JK**. Great test, good condition...**EI7M**. YAESU FT-897D...**ER2OW**. RIG: FT-847, ANT. GP 16.5m high, dipole...**ES0DJ**. 03.01.2017...**EU1ADH**. 73 GL! EU1W EW11 EW1NY EW2R EU2Q...**EU1WW**. Used FT990 100W + 2x41m Zepp...**EU6DX**. Fantastic pileup USA on 15 and 20M...**EW6W**. RADIO AMATER LICENCE N730240 11/23/2015...**EW7BA**. TS-590 HF-37 (10-15-20M) Inv.V (40-80M)...**EW7DK**. Good contest...**EW7M**. 73!...**EW8DX**. 73!...**EW8G**. FT-950 - Antenna center fed...**F1RCH**. Can't wait for next year!...**F4ETG**. trcv FT2000 + ameritron AL811H+ SPIDERBEAM 3...**F4FFZ**. 100W + dipoles...**F4FLO**. @F4FRF on twitter...**F4FRF**. PETITE PARTICIPATION SPIDERBEAM 100W BONNE CONDITION METEO...**F4GLD**. Locator: JN34AB TRX: YAESU FT817 - Antenna 2x10m Horizontal Dipole...**F4GSP**. CQWW in portable station departement 50 near Cherbourg.Weather was quite nice and the propagation also. 88 to all stations contacted F4HJC/P Sylvie...**F4HJC**. First ham licence: 22/02/2016...**F4HQO**. Date of my ham licence june 2016...**F4HRM**. Amateur radio operator certificate 30 April 2016...**F4HSE**. 6TH JUNE 2017 for first licensed...**F4HXC**. Felt a bit lonely during the first night as the 80M antenna failed to work properly...**F4KKE**. F4VSE from North of France - 100W, 7-el. and Delta loop...**F4VSE**. Great pleasure as usual!...**F5JFU**. Log submitted too late. Just to confirm contacts if needed for other ham and for learn the CQ challenge principe. See you next year in time. Thank you...**F5OPR**. Had fun. SSB is not my preferred mode, but had fun. Good to work more DX on 80M than I ever worked on 80 SSB during 28 years!...**F5PHW**. Licensed on 27-08-2015...**FK4QX**. The rotator

under the XM240 and the C31XR is broken and the antennas pointed to the East. A lot of hard works before the contest... **FM5BH**. Ee enjoyed the contest :-)...**G0AZH**. Just played, been ill so thought send a checklog...**G0GFQ**. Brilliant...**G0MCV**. Running 10W into a 17m wire loop in the shack in Banbury, England. Amazed at the contacts made. 1000 KM Belarus...**G0NVN**. Good conditions. SD easy logging programme to use! Busy contest...**G0UKZ**. 100W to an end fed. Lower claimed score, but good fun...**G1EIX**. Great contest many thanks...**G1PPA**. Limited time on the contest. Good fun...**G2BKZ**. Just giving a few points away and chasing band slots!...**G3PHO**. Lots of very bad quality signals, taking up acres of band space. About time some DQ'ing was done, just as for Self Spotting...**G3Q**. Had problem with RF upsetting CAT control and therefore some 21 & 28-Mhz frequencies may be in error...**G3SWC**. Amazed at what can be worked with just 3W and a vertical...**G3WW**. Strange conditions on indoor folded dipole, lots of activity but not much real DX heard...**G3YRZ**. Tx issues on Sunday so few QSOs. Conditions moderate Saturday, good on Sunday...**G3ZGC**. Response to request for a checklog...**G3ZHL**. Conditions better than 2016. 10M patchy but some good QSOs. LF bands very good. SD used as logger again. A very fast and simple program. Looking forward to CQWW SSB 2018!...**G4ADJ**. Bands in good shape and very busy. Pity no Pacific DX was heard. As always, SD Log was as reliable as ever...**G4ATH**. 15M great, nice 10M opening to Caribbean from Eu. Too many poor signals around...**G4CWH**. Just spent a few hours but some good DX worked...**G4DDL**. Two days of good conditions so plenty to work even on the "wet string" antenna...**G4FKA**. Better than last year...**G4IUF**. K3 to 20M inverted V dipole apex @ 5m only 2m above ground at ends!...**G4NBS**. Rig: Yaesu FT817, Ant: GAP Titan DX and Western DX 10 at 18 feet. PWR: 5W hard work at 77 but great fun. Thanks...**G4Q**. I think this is the first time I've operated a contest purely running S&P rather than running as on low power with the band band conditions as they are, I wouldn't be able to hold a frequency. Many stations have mismatched transmit/receive capabilities. I missed a lot of multipliers simply because they couldn't hear me, despite signals being incredibly strong and with no callers. It was a fun contest and good to be back operating seriously again. Thanks to everyone for the QSOs, points and multipliers...**G6NHU**. SENDING FILE FOR LOG CHECKING...**G7IXU**. This process is so arcane. There MUST be a better way. Excel files pse...**G8CYK**. Excellent conditions although predictions were bad...**G8KEK**. Search n pounce. Good contest higher number of QSOs from last year...**G8ZRE**. Submitted as a ckeck log, Great fun Thanks!...**G8ZZK**. Amateur radio team teaching scouts how to enter contests...**GB2GP**. Great contest - poor propagation to the South with Zones 34-39 missed...**GI4T**. Had a great contest no so good on 10M...**GM0V**. Another great contest enjoyed by us all. WX great on the Friday but on Saturday and well into Sunday we had Force 9 gales. Three incidents over the weekend: Couldn't get the cluster to work but was resolved 20 minutes before the start broke and the director decided to spin around like a windmill was due to the wind where a guy broke and our 10M beam came crashing down during the night, it was fixed by 09 2 Rookie operators this year who took to contesting like a duck to water. CQWW SSB is a great contest to learn contest operating...**GM2T**. Propagation was better than I expected...**GM3TAL**. The usual gremlins played their part before and during the contest. It's becoming a tradition. All sent to test us but we prevailed. Both main HF beams suffered feeder wrap-around issues at the tower cages and one of the Icom 756 Pro3's suffered loss of output power too 10 minutes before kick-off. Standby 7300 replaced it. Conditions were actually pretty good but 15M stood out as being the band of choice. We had amazing runs on 15M into NA. We welcomed 2 newbies to the world of contesting too and they did a fine job. Highlight of the

weekend = a KH6 station working a pileup by numbers...**GM6NX**. Basically an S&P Fest, but enjoyed it. I love SD's new frequency, call tracking...**GW4BVJ**. Just testing my new Cushcraft R6000 antenna...**GW4MVA**. Thanks for the calls and QSOs guys! 73/DX Joco...**HA3OU**. Rig: YAESU FT2000 Antennas: 5-el monobander Long John Yagis for 28-21-14 MHz and 4-el. /3 band Trival Quad on 28-21-14 MHz. Lazy-H antennas for 7 MHz (NW-SE/SW-NE) NVIS for 7MHz N/S Single Quads for 3.5 MHz (SW-NE)/NW/SE/ + NVIS for 3.6 MHz (N/S) Delta loops for 1.8-Mhz (NW-SE/SW-NE) / K9AY Fine CONDX it was a nice surprise as 160M and 10M both were opened. Sunday a strong orcan hit Hungary and no AC voltage for more than 2 hours. Thanks for nice contest! Best regards from Hungary! Charlie...**HA4XH**. First QSOs on 160m :)...**HA5DDX**. IC 756 PRO III. 5W ANT: dipole & beverage...**HA5NB**. SSB is not the mode for the living room when family at home...**HA5X**. Contest Expedition to HBØ using all portable equipment. QTH was a bit tough as surrounded by mountains. Still a lot of fun!...**HB0/DD5ZZ**. Single Band 15M...**HB3YRU**. LICENSE SINCE 2016-02-27 ROOKIE RHEIN RUHR DX ASSOCIATION...**HB9/DK6PB**. Elecraft K3 and KPA500 500W, Ant: Force 12 C-4s (2-el)...**HB9AA**. IT'S MY FIRST PARTICIPATION ON THE CQWW PLS TELL ME IF I HAVE MISTAKES...**HB9DTV**. Thx for organising. First sending a log. Feedback is welcome...**HB9FWO**. First license date July 9th, 2015...**HB9FXU**. 2015...**HB9FZB**. Just some points for others...**HB9GNB**. The log of runSTN took VFO B QRG instead of VFO-A...**HB9H**. FOR CHECK LOG ONLY 73S DE DOM...**HB9HLI**. I had only small time to participate. Conditions were good during the two days. RIG: ICOM-7200, 100W, Ant: 2-el. SteppIR and 40/80M Trap Dipol 2 x 13m both antennas 12m over ground. Tnx to all behind, cu next year es 73 de Rudolf...**HB9MXY**. Icom IC-7000, FD3...**HF95OSP**. FT DX 5000 MP + OM 3500 HF + KT34XA I had many problems on 2nd day because of a heavy storm with 130km/hour windz :(73!...**HG4F**. IC756 PROIII + PA, YAGI, dipoles...**HG500A**. ICOM 756 pro 100W 3-el. yagi GP-s dipoles...**HG500E**. Hope better conditions next year...**H18PJP**. Assisted...**HK3J**. My first contesting from Rep of Korea. Thanks to my host, Lee, DS4EOI...**HL2ZDA**. Thank you every stations for every my score. See you again on the bands...**HS8LVC**. Grande partecipazione anche se dal mio punto di vista la propagazione la propagazione non e stata gran cha con i miei dipoli mi ha permesso di fare la mia partecipazione grandi cose...**I0BYR**. ENJOY THIS CONTEST. HOPE TO HAVE MORE TIME TO OPERATE IN THE NEXTONE...**I0PNM**. QRP ELAD FDM DUO. Pwr: 5W, Ant: calculated tap 39m long 10m high for all bands...**I2BPP**. A serious test to my new high-bands setup. Passed. Still work to do for the low bands (40 and 160) but I had a lot of fun already...**I2WIJ**. 10M closed, 15, 20 and 40M ok. Given the propagation I thought there would be less activity. More than a few interesting QSOs. Rig: YAESU FTDX3000, no amplifier, power about 90 / 100W. Ant: 40M AVT4 ECO (G.P.) - 15 and 20M TA32 Jr. Mosley...**I3LTT**. My QRP station: Renger 2950 + attenuator to get 5W output, my antenna: Yagi 4-el. monoband for 10-20M from the ground. The propagation was beautiful, but my luck was to meet the powerful stations operated by OMs great availability, which made the result of this interesting LOG...**I5KAP**. Few QSOs. S&P just countries and zones. Inverted vee, K3, PA...**I8UZA**. Our first time ever in M/S Low Power. Running and working multipliers in SSB, mostly on crowded bands and pileups, was really suffering. Unexpected very good 10M conditions on Saturday...**IB9T**. Great fun on Saturday, a little less on Sunday. Thanks to MOMOBEAM for the excellent performance antennas...**IF9A**. Checklog...**I13E**. Amazing condition after few years.Tons of U.S. stations were so strong here even if the propagation cycle is going down. I had fun even if my score could be better if I was able to catch a few more multipliers...**I18M**. All ok...**IK0EBA**. Rigs = Sommerkamp FT-7 (QRP or

+ 100W Booster) or IC-718 or MFJ-9420 (QRP) Antenna = Inverted-V Dipole Max Power Used = 100W...**IK0VWH**. CQWDX SSB CONTEST 2017...**IK1TNU**. This was fun, but QRP was tougher than expected. Thanks to all who stuck with me...**IK2CFD**. Fun experience with my new SunSD2pro...**IK2XDE**. Con una antenna verticale multibanda non si possono avere troppe pretese. Divertimento garantito...**IK3SSW**. Nice propagation on 15M...**IK4LZH**. TNX 4 ALL 73s...**IK4OMO**. Only 15 min, just for test my old rig, a TS830s...**IK7LMX**. Weak propagation to operate in QRP, but I spent some fun hours. 73...**IK8YFW**. TS950SD + TL922 (only 1 tube! 400W) Antenna dipolo 2DBQ...**IN3AHO**. License granted on March 7, 2017...**IN3GYN**. Very poor condx, few dx, still enjoyed contest!...**LA2AB**. Worked with receiving apex loop for the first time. Helped a lot on 160, 80 and 40M. 6-el. logaygi on 20M, k1wa array on 40M and vertical loop on 160M. Dipole on 80M. Had a rather windy day. Happy this was not a field day...**LA4C**. We rented a cabin at locator JP60EE and temporarily installed 7 antennas. The best antennas we had were 3-bander Spiderbeam and hexbeam on 10m high masts, last year the best we had was 2-el. VDA for 15M band. Another improvement from last year was one power amplifier available. This allowed us to triple QSO count. Finally

we could even get "big gun" feeling with successful runs towards Europe and North America. Saturday evening brought nice surprise on 10M with South American stations coming quite strong to Norway. It was very nice contest with some funny and pleasant moment...**LA40**. Thanks to LA4HC for letting me use his fine station again. Fine conds despite the low SSN, but few stations worked in AS/OC, no 160M, some CAT/logging issues and no 40M on Sunday. Still, a good contest with 43 hours of good fun and new personal best score...**LA6VQ**. Licenced from December 13, 2016...**LA7IJ**. Good conditions!...**LA8OKA**. Check log...**LA9PJA**. Big respect for all radio amateurs who use legal output power and clear outgoing signals. And big shame who run over legal output and did big havoc on a bands with a dirty outgoing signals. Thanks for contest!...**LB1AH**. Just a few QSOs for fun. No time this year, but great conditions!...**LB4CD**. Very tough 160M because QRN, many repetition needed. Prop was often one way...**LU2DKT**. <www.lu5mt.com.ar>...**LU5MT**. LU contest group...**LU6DU**. Too few time to enjoy it, 10M was OK, 40M was disappointing, and very high local QRN all weekend killed 80M...**LU8EHR**. Nice contest, not good conditions but exquisite food...**LU8YE**. Solo 28 mhz...**LW7DJ**. Good condx on 28 MHz!...**LW7DX**. Thanks to Luxembourg for being so nice, friendly and welcoming :)...**LX/G1TPA**. Was very good propagation, but as i had some problems on 40M with my antenna, i changed on Saturday night to high power, so it was half low and half high (500W) but nice conditions on all bands...**LX1ER**. First 20 minutes of contest, was lively. After that, heavy. It was hard to call many multipliers, in particular A44A, which I did not do :)...**LY2BMX**. ICOM IC-7300 100W. Steve...**MW0VRQ**. Rookie passed Foundation 26th August 2017, 5W QRP station and 1st contest...**MW6KGY**. QRP was a killer at these band conditions...**NH6AB**. Operated on generator, no internet, ate MREs...**NP2N**. After surviving two cat 5 hurricane...**NP2Q**. Better conditions than expected...**OA4SS**. Licenced on 20th of October 2017!...**OE1ABV**. 2016 / 12 / 01...**OE1GAQ**. Participated again with vertical antennas from my 6th floor corner balcony...**OE1HHB**. Storm in Austria with short-time gusts up to 140 km/h This year, I was not QRV on 20M band. More activity on 10M band than I expected...**OE1VMC**. Nice contest, but very windy (storm warning) here on Sunday. Conditions wasn't really good. Sorry...**OE2IJL**. Had to merge 2 wintest-logs, as one PC crashed during the contest...**OE2LCM**. Did some antenna testing and comparison with good results but had to leave for great periods because of severe storm on our hilltop location. However, still could achieve a new OE-record...**OE2S**. Thank u! i enjoy this contest every time. 73 Mike...**OE3MDB**. What a surprise to see 15 and 10 open, when we expected the worst. Great pleasure to meet so many old friends on the air. CU 2018...**OE5T**. Due to later QSO looks my log changed some rcvd Zones to 59 + 30 nw NO #...**OE8TTR**. Found unexpected nice conds, wish i would have had more time beside family...**OE9MON**. A couple of QSOs on 40 before moving to 20M single...**OF1AF**. Quite good conditions compared to sunspot cycle, thanks for the QSOs!...**OF1F**. Nice contest!...**OF1TD**. Forcing 21 MHz low power into 14/28 MHz yagi feeds with a tuner...**OF2MZA**. Testing wide-band 5-el. (28.0 - 29.7 design) up 7m. Great condx!... **OF3BCX**. I had focus on multipliers this time. Hence, as many country multipliers as QSOs. Propagation was quite nice, even 10M was open for a while...**OF7KA**. Propagation was quite nice. Worked with quick installation delta loop...**OF8JIX**. Leisurely operation with proper sleep! Conditions surprisingly good, a couple of nice W/VE runs on 15M (Sat) and 40M (Sun post-sunrise)...**OH0X**. Received zones not logged because I only gave points to others...**OH1HD**. Yagi with 10 ms pattern reverse (relays). A nice low-power experiment...**OH1QX**. Rookie, licence Jan. 21 2015...**OH1XFE**. Rig Kenwood TS180S, antennas Cushcraft R5 vertical and W3DZZ trap dipole...**OH2HZ**. 73...**OH2IS**. Received zones haven't been logged because I only gave points to others...**OH3RB**. CHECK-LOG...**OH5XB**. 20 / 08 / 2015...**OH5Y**. I don't like SSB contesting, that's for sure. Normally I participate SSB contests just to give out some points and to do some experiments with my station. This time I was testing my newly built stack of three TH7DX tribanders. It was nice to see that antennas performed well especially when you need low take-off angles. With the help of this new setup I managed to work several stations from zones 3, 4, and 31 during the late Saturday evening & night via polar path opening on 15M.

A special thanks to WA6TQT, KH7M, VE6FI, NH6V, KH6J, NH6JC, VE5PV, KH6CJJ, K7ZS, W0AIH, W0CP, and AA9A to realize that I wasn't from Asia but from EU and your patience to pull me out of noise. I was able to hear dozens of other US stations during the evening & night on 15M but unfortunately they were doing S&P and therefore no opportunity to make QSO with them. The last US stations on 15M were audible here as late as 23 UTC (02 AM local time). CU in CQWW CW! Jari...**OH6QU**. First date licensed 2nd of February 2017...**OH6UX**. High fever on Sunday morning caused the op to go QRT...**OH8X**. Used Synthesized Voice Keyer: <www.youtube.com/watch?v=CDPjP72oSiU>...**OK1FIG**. FT1000MP MK5F INV.L...**OK1JOK**. Visitors: Dan VA2DJ and his DAD Joe, Greg V3EYGG, Al VA3ERE and Oshan VA3WNO A great contest working DX as well as North America. The VE3DC bunch had fun getting everyone to understand the Sea to Sea, C2C on the end of the call. This was our Special Event Call for the 150th Birthday of Canada as well as our 85th Anniversary of the Hamilton Amateur Radio Club. Murphy struck in that 2 of our antennas were unusable, but we were still able to use the others to make a good go of it. Thanks to our great operators, the many other operators from all over the world that gave us contacts and also the many US Hams that worked our sometimes difficult Special Event Call. It was great fun but we will be glad to go back to using VE3DC hi hi. 73 Rick VE3BK...**VC3C2C**. Conditions were way better than I expected. Great long openings to Europe on 15, 20 and 40. Even 10M was a surprise especially on Sunday afternoon when all the Caribbean expeditions were on, as well as many from Brazil popping out of the silence. It had more of a 6M feel. Looking forward to CQWW CW operating from Vancouver Island...**VC3X**. K9EL is not a member of YCCC...**VE2BWL**. One more DXpedition to Zone 2 behind. 1700km driving to Zone 2 through mountains of Northern Quebec. Came to Sept-Iles in 2 days in advance to CQWW SSB, during this time were installed 4 SQ on 80 and 2 SQ on 40 under strong rain and windy weather. Conditions on 14 and 21 was better than expected. Thanks for great help to Rob VA2RDK, Frank VA2FGG, Yuri VE3DZ, Max VE3CCN and to all who called me during CQWW. 73, Igor VE3ZF...**VE2IDX**. Hopefully I will have more time available next year!...**VE3FTM**. Licenced January 2017...**VE3ISG**. First contest...**VE3LBG**. Set up at the local conservation area and had a great time!...**VE3LMS**. Licensed date 03/23/2017...**VE3MJD**. December 30th 2015...**VE3MZD**. Spent most of Saturday fixing an intermittent Balun on a KT36XA and the putting it back up! Glad I did 10/15 were R&R Peter...**VE3PN**. Home from ship due to passing of my father. Some QSOs to his memory...**VE3RCN**. First Licenced 08 FEB 2017...**VE3SCN**. REMOTE - K3 / Optibeam marginal conditions here...**VE3UTT**. I have resubmitted this and I forgot to check the rookie box previously...**VE3XKZ**. Vertical and dipoles with 100w TS590S. 15 hours but still fun...**VE4EV**. My first time submitting. Obtain license in March 2016...**VE6FRD**. The 40M band continues not to provide the required performance we keep on working for. At our QTH the 40M prop door is one way. European stations deliver S9 plus signals to our 40M yagis at over 100 feet, yet they continue to CQ in our face, not even a QRZ again. The window when we can gain access is very short here, less than 30 minutes...**VE6SV**.

Operating from VE6JY...**VE6WQ**. I had a lot of fun in the limited time I had for the Contest. Most of my 20M contacts were done on a vintage FT-101Z and FT-897D on 80M. I used my classic IC-751A for my 15M contacts. 73 Gerry...**VE7BGP**. Band went completely dead so I gave up early. Not a serious effort...**VE7GL**. Very new to the contesting. This is the first log I have entered...**VE7WGJ**. Early in the contest I hear W2##. I give him 59-01. With his voice dripping with contempt and sarcasm he responds with "This is the CQ World Wide Contest. We give zones, not serial numbers." Just when I thought I'd heard it all...**VE8NSD**. Excellent conditions for a change...**VE9HF**. Conditions on 40-10M surprisingly good, especially 40 and 15M. 10M was also a real surprise with openings to Asia, Europe, and North America. 80M was poor and also high static levels with very few stations heard/worked. Nothing heard on 160M. A great and very enjoyable contest...**VK2BJ**. It was good to see some NA to VK openings on the 10M band...**VK2GR**. Actual TX Power: 100W Excellent conditions. Would have been great if my newly erected HB35c had worked. I used a 40-20M dople at 25 feet...**VK2LEE**. ONLY 4 MONTHS NEW, FOUNDATION LIC OBTAINED 30 JUL 2017. WAS VERY HARD WITH LOW POWER, "AGAIN AGAIN" WAS SO COMMON COMEBACK. ICOM 7300 WITH A G5RV ON A BUSH BLOCK HELPED...**VK3FMFB**. It was great to get a 10M opening to the east coast USA in the last hours...**VK3GK**. For this contest, only time for a few QSOs. Conditions on 40M band were surprisingly good. Hope to have more time, for the next contest. 73s from Ron...**VK3IO**. Good fun contest nice to see 10M open to US in the final hours...**VK3MEG**. Actual TX Power: 100W First Licensed 4th September 2015...**VK3TNL**. 80W, very difficult conditions. 73...**VK4AFU**. Actual TX Power: 100W...**VK4ATH**. Bands came alive so good fun...**VK4CL**. Checklog only...**VK4ZD**. Great contest and helped my DXCC count! 25 new SSB & 3 ATNOs. Tks CQWW SSB...**VK5GR**. Hard going from South Australia this year...**VK5LTD**. Actual TX Power 100W...**VK5MK**. Actual TX Power: 100W. Location very noisy this year...**VK5UE**. Operated from my vehicle near a local lake with a boot-lip mounted multi-tap vertical. The number of stations on 15M was wonderful and making QRP contacts was fun...**VK6FLAB**. Contest entry dedicated to the memory of Nick VK6VAX...**VK6RT**. 40 & 15M were open. 20 & 10M showed no activity at all!...**VK6WX**. A few hours each day. Conditions not great but fixed up some more antennas at the remote!...**VK7GN**. Tough conditions on 15M on Saturday...**VK8RD**. Conditions better than I expected. D3 Dipole Ant at 30ft with 500W. 73...**VO1BQ**. First time from Harbour Rock at Turtle Creek in Turks and Caicos Island. Some challenges with band conditions, but overall a great contest. Station location was in great shape, especially after Hurricane Irma struck the island only a month before. Great group effort and looking forward to many additional years...**VP5W**. Icom IC-707, Carolina Windom antenna, 40-10M Yaesu Tuner FC-700...**VU2DED**. RIG: TENTEK 540, ANT: LONG WIRE, 70W...**VU2NXM**. 3 RD CONTEST...**VU2YVK**. 03/30/2017...**VU2ZMK**. License Date: 03-03-2015...**VU3ESV**. MY LICENCE WAS ISSUED ON 7 NOV 2016...**VU3OXH**. First licensed as a radio amateur on 10th May 2016...**VU3WBB**. My licence was issued on 29 July 2016...**VU3XIO**. DATE OF FIRST LICENSE 20-05-2016...**VU3YPP**. We approached this contest with modest expectations. We expected to be louder as we were transporting an amp north, and we had some ideas on how to improve antennas. The amp arrived in good shape, but the hand-carried 3-500Z didn't as it appeared that the anode and cathode were shorting. Placing the amplifier in a non-standard position did allow for operation but originally only on 80M and 40M. On the second day, it decide to work on 20M as well! Our 80M vertical dipole did allow us to get on the band and we could hear lots of stations, but alas, we were not heard. 40M sloper and 20M Moxon together with the 5 band R5 vertical did okay for us. This year we

added a rotator for the Moxon and that improved the 20M situation. On 40M, the 61 Qs is by far our best effort on that band and while we didn't expect anything out of 15M the 3 contacts yielded 6 mults. The stars did align on the operating front and for the first time, we could maintain 48 hour coverage. So, our modest expectation was to beat last year and a hoped for 200 Qs but in the end we more than doubled that and hopefully exceeding that of 2015. It's a modest score in comparison to other multi-single efforts, and our efforts will never overcome the reality imposed by a latitude of 80N and a location that is measured in 10s of kilometers from the geomagnetic pole. Our thanks to all that dug us out of the noise! In keeping with the educational component of our day jobs, we also are introducing some of our colleagues to the thrill of contesting. Some may have noticed a new "voice" from time to time. 73 de VE3KTB and VE1RUS...**VYØERC**. Great contest!...**VY2GF**. Rookie first licensed December 2015...**WH6FAM**. Operators: Alan ZL1RQ, Graeme ZL1SG, and Maurice ZL2MF, ably supported by ZL2MF'z XYL Gillian and junior op Oliver A Great weekend in the winterless North of NZ...**ZL1RQ**. Actual TX Power: 100W. Some what trying conditions for this little pistol station. It is unfortunate that 10M band didn't open up for me and north eastern heading had poor conditions. Anyway had fun and consider that the score reflects how it was with Hex beam and wire dipoles and 100W. 73 to all...**ZL1YE**. This contest was a real nightmare! First off I had had a windstorm destroy my 20 and 15M quad some month's ago. I needed replacement antennas. I decide to build a plumber's delight yagi for 15M and place it over my 10M 5-el. yagi. The construction took longer than anticipated (as always!) and I only managed to get it completed by about 0800 UTC on the Saturday. This took out my Saturday morning 40M short path to USA opening which I was relying on. There was still no 20M antenna so I put up a very low (about 8m high) dipole for 20M. So the antenna situation was as follows: No 80M antenna, a 40M wire MOXON rectangle at 20M high beaming at North America, a lowish dipole for 20M, a 3-el. yagi for 15M (ARRL antenna book design with a gamma match) and my trusty GØKSC designed 5-el. OWA yagi for 10M. After starting using my ICOM IC 736 barefoot (100W) all seemed ok until suddenly its tuning knob seized up solid on me! So now I had a rig which wasn't really useable. At this stage I went and fetched my Kenwood TS 50 and used this for the rest of the contest. If this wasn't enough it appeared that the bands were suffering a severe lack of sunspots as the conditions were somewhat lacklustre. (you know conditions are bad when you call K3LR and don't get a response!) All in all though a fun time was had and I'm looking forward to the CW test in a few weeks time when I hope to have a 20M yagi made and installed and also a vertical for 80M...**ZS2NF**. Computers refuse to work when you want them to...**ZS6BRZ**.

USA QRM

Great contest! Hoping to add to my 80M country total...**AA1SU**. First licensed 10-19-2015...**AB1YK**. Propagation much better than expected. Not great, but decent...**AB2TC**. RESUBMISSION. Contains all 128 QSOs now...**AC0DQ**. Just licensed 2 weeks ago - What an awesome contest!...**AC3BQ**. 160m propagation did not favor my locale. Had lots of fun...**AC4G**. What is meant by "certificate" in the line above?...**AD0H**. 2nd biggest surprise - working JA on 15M Sunday 1st biggest surprise - working YE2A on 15M Sunday. 15M was better than I expected on Saturday. I could not operate during the European window on Sunday. I did not hear a peep on 10M Saturday but worked a handful of stations to the south on Sunday afternoon (zones 8/9/11/12/13). I did not work any USA stations, so could have had a least three more country mults...**AD1C**. Thank you, everyone, for the politeness shown during difficult contacts. My first time submitting a log!...**AD7BI**. Thanks!...**AD7MM**. Operated 16.5 hrs...**AE6YB**. Nice 10M opening to Central/South American Sunday morning...**AE7VA**. 2nd year Rookie, had a great time with my portable setup!...**AG5DB**. Thx to DX for working with us low power, antenna challenged operators...**AG7AA**. First test in years Wire OCF dipole...**AI3Z**. Always fun! Thank you!...**AI6IN**. 100W with attic 40M CFZ...**K0BWQ**. Guess things have changed since my last CQWW ('99?). Had to get N1MM log program to convert my DX4WIIN file to Cabrillo format. I should have used N1MM in the first place...**K0EV**. Very first DX contest. Sure hope all these guys get credit for their work...**K0LBR**. FOR CHECKING PURPOSES...**K0OI**. Condx better on Sunday had fun doing 99% S & P...**K0OU**. Operating time 1:15...**K0RC**. 15 and 10M were better than I expected...**K0SCO**. Heard a lot of stations that couldn't hear me. Had a good time. Looking forward to a little better band conditions next year. Thanks for your work in hosting the contest...**K1AUS**. 73...**K1BZ**. First Licensed on Nov. 3, 2016...**K1DVL**. Licensed 2015...**K1ECU**. Even with a storm on the horizon, and possible SKYWARN activation, I still had time to enjoy a little of this contest. Always fun!...**K1MTD**. Not sure what to put in here...**K1XM**. THIS LOG IS A CHECK ONLY...**K2GG**. I never expected to be heard overseas operating SSB...**K2JF**. First licensed 07-Jul-2015...**K2MV**. DIFFICULT TO BREAK THRU AT SUNSET - EU TO EU...**K2RR**. Tough going with a multi-band vertical, hi...**K2TE**. 05/10/2017 ROOKIE...**K3ABE**. K3CCR is the club station at the Collington continuing-care retirement community at FM 180W in MD, just east of DC. For CQWW SSB 2017, N3UM and W3GB operated Multi-Two Assisted. As two retiree ops, we're ready to stay up late OR get up early, but no longer do both in the same overnight. We used our new JK Falcon beam (2-el. on 40M and 4-el. on 20M) for the first time in a DX contest. It did very well. On 40M we got 2X as many Qs and nearly 2X as many mults as we did in 2015 and 2016 CQ SSB using a good high inverted V. On 20M we got almost 2X as many Qs and a dozen or so more mults than in recent years, and made single-band DXCC. We were surprised at our good 15 and 10M results with SFI so low. We found it productive on all bands to switch among clicking on spots, CQing, and tuning, changing when the band map was worked out or the run or S&P rate fell. Tuning found many loud CQing stations that had not been spotted. Run freqs were scarce. We got a few fast but short runs, 100/hr but only for a few tens of minutes. We were happy with our final claimed score, our best in CQ SSB and better than N3UM got in 12 years of SOHP. We worked 116 total countries. It was fun to work rare and/or distant mults 5T, BY, FR, JT, SV5, and KH0...**K3CCR**. 3 X-QSOS ON WRONG VFO NICE TO WRK 4S7AYG ON LP. ONLY UK HEARD G3TXF CALLED FOR 20 MIN NO Q!...**K3EST**. DB-18 180 feature was handy on JA/SA openings...**K3IE**. Late start. Old guy...**K3JD**. First time entering the CQWW DX SSB Contest. 73...**K3LT**. Only wire antennas in the trees...**K3NDM**. At K4QPL...**K3TD**. Band condi-

tions on 160M were very challenging for QRP (5W)...**K3TW**. DIS-APPOINTING...**K3URT**. Sure was nice to have 15M to EU again...**K3WJV**. Guests departed around 1600 UTC Saturday, so I drove the 160km to the shack in WV expecting to put in a "classic" 20-24 hours. However, problems with software used with my SDR and an operator error required more time to be spent on equipment than actual operating. I'm still working to fix an audio delay problem that at times made operating impossible. The delights of modern SDR. Mid-afternoon Sunday thunderstorms struck, winds increased, and the temperature plummeted to 3 degrees Celsius (37 Fahrenheit). I took that as a sign to leave. But I did make at least one QSO on each band. Interesting to find one lonely signal on 10M at 1445 Sunday. It was CR3A working VU2 and EU before he heard me, I would guess off the side of his beam. JR8YLW also was worked on 40M with my trapped dipole at 1201, 20 minutes after sunrise...**K3ZJ**. First Licensed 10-22-2015 Worked 5 contacts near contest beginning that were OOB...**K4AFE**. Licensed 06-2017...**K4AKK**. Thanks CQ...**K4EOR**. Good conditions even if limited to two bands...**K4KAY**. UNIVERSAL STUDIOS TRIP THRU SATURDAY OCT. 28 MORNING AND ACTION ITEMS POST THAT TRIP AND SICK (COLD) THRU ENTIRE WEEKEND...**K4QR**. My thanks to all those who struggled to copy my weak signal...**K4SXT**. Thanks a lot for the fun. Enjoyed my 3rd CQWW SSB contest!...**K4VBM**. First licensed as KM4KGZ on May 4, 2015...**K4VDX**. 73...**K4WLG**. I was just licensed in 2016. I enjoyed this contest...**K5LGX**. All had a good time. The newbies learned alot...**K5LRW**. I was working DX in the CQWW Phone contest...**K5QY**. Horrible line noise and two broken antennas - a prescription for a quick QRT. I was able to copy LU2DKT calling me on 160 for at least a moment of fun. Of course, some helpful soul berated me for not hearing some statesiders calling me off the back and sides of the Beverage. Ham radio is mostly crotchety old men these days and they are getting older and more crotchety by the day!...**K5RX**. 05/2015...**K5SVV**. I wish more DX had checked 10M...**K5XU**. Highlight was a 263 hour on 15M Saturday morning!...**K5ZD**. This log is to replace previous submission. Note: the software did not score 3pts for my second entry and I am not able to correct the log...**K6BEW**. Conditions were tough. I struggled to get to 100...**K6MUG**. Another great contest. I had an extremely enjoyable weekend...**K6PGH**. What a blast. Thanks so much, I had fun!...**K6TER**. Bands not too bad. 10M opened Sunday afternoon for some nice Qs to SA. Tnx to all for the Qs. CU on cw...**K7ABV**. Fun contest!...**K7BVT**. First licensed 05/20/2016...**K7HKR**. Camped out in Central Cascades and enjoyed hunt and pounce in an evening...**K7RMZ**. Licensed 08/14/15...**K7VNC**. Started this one just to keep in practice on a SSB contest as my station needs better conditions to be competitive. With a flux of only 75 my expectations were fairly low. Fri nite began with moderate conditions as there were no solar storms degrading things. As time passed it was clear this would be one of those events where he who keeps his butt in the chair and grinds it out will win. 15M was open to ASIA at the beginning. Within minutes I found VK9CI calling CQ unanswered and snagged him fairly easily which brightened my day considerably. If it wasn't for the local power line noise I would have done much better on the low bands. I Went to bed around 2 a.m. & didn't get back to the radio until Sat afternoon. Both 15 & 20M were doing well with loud Asians rolling in mixed w/the usual Caribbean/SA suspects holding forth. I went to bed around 10 p.m. to chase the morning path to EU on 20M which was not great but certainly workable with some repeats of info. Worked a 4S7 on 20M Long-path which really made me smile as its been many years since that has happened! The best surprise of the weekend was when 10M opened mid afternoon to SA and later the S PAC! Worked the band hard looking for every Mult/Q I could find. Only tried to run stations a couple of times with limited suc-

cess so almost all of the weekend was Hunt and Pounce. All in all I am happy with the results of almost 500 Qs and several new ones on various bands. On old IC-746 driving a AL-80B to 800W or so. All Antennas Homebrew. 160M Inv L @ 30', 80M/40M Fan Inv Vee @ 38', 20M 3-el. Mono-bander @ 43', 15M 3-el. Mono-bander @ 30', 10M 4-el. Mono-bander @ 25'. See you in SS CW! 73s de Tim, DM09jh...sk...**K7XC**. First licensed in 2016...**K8PJK**. Nice to see some 10M openings to South America...**K8YSE**. Paper log typed by VE3EJ...**K9JDV**. LICENSED OCTOBER 2015...**KD2JQG**. 3.5 hours of fun...**KD2KW**. Casual run on Sunday only, after some time away from HF. It was a struggle this year, as the bands overall still seem to be in a state of decline, and I'm on a small indoor station. Nevertheless, it was fun to get back into HF contesting again...**KD4ACG**. In Memory of Phoenix, the DX Dog. 2003-Dec. 19, 2016. He was always in the shack with me...**KD4QMY**. Ten-Tec Orion, THP HL-1.5KFX, 146' End Fed Wire...**KD5UVV**. Hilltop portable, generator powered, 100W to vertical & dipole. Great fun!...**KD6RMS**. Bands were not good for a low power station entry...**KD9MS**. Rookie...**KEØCRP**. Licensed 05/19/16...**KEØJFZ**. Rookie 7/10/17...**KEØNWG**. Operated with Inverted V on 20M and 40M for about 6 Hours. Limited antennas and low power were big limitations...**KEØOR**. Did better than I thought, but didn't make my goal score of 1 meg, although not bad for a 43 foot vertical...**KE1IH**. I need to correct one mistake. See corrected log entry...**KE1Q**. Added a TH2 @33' and the ZS6BKW @55' and the TH2 added great fun to the hi bands for 10,15 & 20M during the low end of the SS cycle, it performed better than expected at a low height. Lots of S&P but some runs on 15 & 20M made great fun but lost the wire antennas Sunday night with two 75' trees blew down, be back next year with other low band antennas for a small lot...**KE2TR**. First time uploading...**KE3GK**. Paper log typed by VE3EJ...**KE4FVU**. Rookie...**KE4PLT**. Low points, but thought I'd throw my hat in there...**KE8EAS**. Date Licensed = 04-08-2015...**KG2DWS**. 100W and a wire!...**KG5KRZ**. VERY NOISY CONDITIONS! But, I still had fun contacting DX stations. 73...**KG8FE**. Minimal Condx here. FT-3000D/AL-80B/160M OCF dipole @ 40ft. 500W...**KG9Z**. Com Tech amp dies around 06:30Z Sat night...**KI7M**. First Licensed on March 15th, 2017 Still very new to radio and contesting Any help/critique appreciated...**KI7MAT**. Operated only on 15M this time. My thanks to the contest organizers...**KJ8O**. Power=80W, antenna=G5RV dipole, equipment=TS570S, grid=FM18eu Thanks for the fun!...**KK4BZ**. Bands really opened up on Sunday!...**KK4RV**. First Licensed 2015...**KK6VZE**. Rookie (2016)...**KK6ZUU**. RADIO IS A STOCK YAESU FT-817ND. MAXIMUM POWER OUTPUT WAS UNDER 4W...**KK7VL**. First licensed 11/04/2014...**KM4FLU**. It was obvious this year, that due to the poor band conditions, 100W and a wire were totally insufficient to

be competitive in a DX contest. it was very difficult making the few contacts I logged. the other stations had a hell of a time pulling my call out of the noise...**KM4HVE**. Licensed October 2015, 1st time entry...**KM4ODS**. 2-26-16...**KM4RKT**. 14 year old operator. Licensed on 03/15/2016...**KM4SII**. Great contest but not so great band conditions. Conditions seemed better on Sunday compared to Saturday. Lots of European stations coming through to the west coast on 20M Sunday morning and early afternoon. Conditions last year were much better. Only wish we had better propagation on 10M...**KM6JD**. First contest I ever entered. Sunny sky with blustery wind Froze to death but enjoyed it...**KNØBBY**. CLASSIC and ROOKIE with FCC grant on July 27, 2017...**KN4EWI**. Good to be on the air...**KOØZ**. I wasn't well enough to operate but I turned on the radio Saturday AM and 15 was HOT! Sat down and operated off and on when I could. Back-to-back 250+ hours on SUNDAY was a first for me! Great fun and wonderful to work old and new friends as always. My best wishes to those testers and their countries as they rebuild from the damage of those terrible hurricanes. Tnx for the Qs and the mults! 73 Bob...**KQ2M**. Not expecting a score. Just to help others verify contacts with me...**KQ6RS**. The first 9 hours were a real slog. Things improved from there. I still get a huge thrill working each QSO with QRP power...**KR2Q**. Wow, heard only 1 DX stn on 80M Sat. eve, 6Y1LZ that I chased for 2 hours before finally getting him and then was about to QSY to 40M when I heard CN2A who disappeared quickly but what followed was a pipeline to zone 33 for 2 hours and worked more Africans on 80M ssb than ever before including CN2A later on-amazing with random length homebrew mess of wires with a tuner @ only 40' here!...**KS7T**. Had a good time as always...**KT4FQ**. The operator was in WA state and station in VA...**KU1CW**. 45 minutes before the contest the Alpha blew a fuse. No back up amp. With only wire antennas I was not competitive...**KU4V**. Rig: Elecraft KX3 Transmission power: 12-15W Antenna: 35.5' end-fed wire sloping from 25'...**KW4LY**. Put up new-to-me SteppIR at new NJ QTH and this was shake down cruise. Weak link in the setup was the OLD operator. Had fun!...**KZ2I**. Used 5W QRP to dipole antenna at 65 feet. Many heard, few worked...**KZ3I**. This is my first CQWW log entry, please use this as a check log only...**NØNZG**. Played around a little. Did mostly DX chasing. The 15 and 40M bands were very good...**NØODK**. Bands seemed a little weak. Nice openings into Europe and SA. First time for the SteppIR in CQWW. I like it!...**NØOST**. Tough conditions this year – really tough to break through the QRM/QRN. Only had a couple of hours to operate too...**NØUK**. 15M single band entry...**NØWRK**. KX3/PX3/KXPA100...**N1SER**. Radios: Elecraft K3 w/KPA-500, ICOM IC-756 PROII with PW1 Logging Software: N1MM TX Antenna: TA-33 for 20/15/10M I 160/80/40M Dipoles...**N2CW**. Trying assisted this time. Not sure if I will stay assisted but we'll see...**N2RJ**. 15M just exploded Saturday morning!...**N2SR**. Conditions OK. Seemed like many stations had good signal but I had a bit of trouble getting back to them...**N2UJN**. I wasn't going to bother with the contest, but thought why not, and spent some time Sunday working it just for fun. Well, those few hours changed my shack. I took the KWM-380 off the operating table and put it over on the "vintage" side of the shack. I put TS-590SG on the table instead, and I'm still busy making other changes to the "modern" side of the shack. I might actually do this for score next time. I've never been much of a tester, but that may have changed!...**N3CMI**. Not as much fun as I had hoped for...**N3RS**. My first DX contest. Really helped toward a DXCC...**N3XKB**. I never intend to win. Just to enjoy operating and enter a log...**N4CU**. Thank you...**N4GDG**. ROOKIE...**N4IHS**. TX: Ten-Tec OMNI 6+ Antenna: 2-el. yagi at 60 ft Logging: N3FJP...**N4IJ**. No score claimed. Just a casual operation...**N4JR**. Enjoyed the brief time I got to play!...**N4NTO**. Forgot about the lower part of the cycle. Things always come to life during the

CQWW. Things coming in from all over the place for most of the day. Thanks again to CQ for sponsoring this great event...**N4PN**. Good way to spend a rainy weekend at our mountain house!...**N4PSE**. 500W to 3-el. tri-band yagi...**N4QS**. Missed several countries, condx poor, sigs weak. Always Fun!...**N4RJ**. First CQWW in 15 years. N1MM Logger best ever!...**N4UK**. First Licensed 07/19/2016 as KM4VLK. New call N4VLK issued 10/12/16...**N4VLK**. All S&P Lots of good signals...**N5KB**. Cut short by a power outage but had fun. Fun is what it's all about...**N5KDA**. My first CQWW contest. Minimal antenna but I worked some new DX. Fun!...**N5LXI**. Licensed as KE8CRD 12-07-2015 Vanity call N5MKY issued 02-12-2016...**N5MKY**. Thanks to all for the fun. Great operators out there worldwide...**N5OCO**. First contest using my new 43' vertical instead of temporary OCF dipole or attic antennas. I'm exhausted! I wish there was an exclusive 100W 24-hour DX contest! That would be awesome – or it might be really quiet. I wish to say Thank You to CQ Magazine and everyone involved in hosting this contest and rating entries – and to all the DX stations who worked me even though I wasn't easily heard. I also want to thank N1MM for providing such a great contest logging program – Wow!...**N5ZY**. Score increased by 11,000 over last year...**N6AJ**. 10M is alive!...**N6KN**. 1st contest submission...**N6PS**. I almost gave up after struggling through Saturday. Slept 6 hours on Sunday morning. When I got up conditions had improved. Even 10M took off. Plenty of Europe on 20 and 15M. Debated about going to the 20M zoo in the last minutes of the contest. I did and it paid off. VK9CZ was the second station I worked. See everyone in the CW segment!...**N6RV**. ROOKIE SEP 11, 2015...**N6SAC**. Always a great time operating this one!...**N6WM**. Rig: Yaesu FTDX-5000, 2K-FA Ant: SteppIR @ 54 ft. Had a great time playing in the pileups. TU es Best 73 to all, Bill...**N6WS**. Medium Power 350W, using Icom 7300, into Comet H-422 rotating dipole...**N6YFM**. Icom IC-706MK-2G,a MA5B up 22 ft., and a ZS6BKW dipole up 40 feet...**N7MZW**. Portable 6 from Crescent City, California...**N7RVD**. Conditions better than expected lots of calls not previously in Super Check Partial LIDs still calling and calling instead of listening...**N7WY**. Used FT-897D on battery power running 35 to 50W...**N8BGR**. Surprising good conditions...**N8BI**. FIRST TIME IN MANY YEARS OPERATING LOW POWER AND SINGLE BAND. CONDITIONS WERE QUITE GOOD. FOR LOW PART OF SUNSPOT CYCLE, THAT WAS QUITE UNANTICIPATED...**N8DE**. COULDN'T DEVOTE THE TIME I WANTED SO NOT AT ALL CLOSE TO LAST YEARS SCORE, BUT ENJOYED EVERY MINUTE. BETTER TO HAVE CONTESTED THAN NO TEST AT ALL! THANKS ALL FOR ANOTHER GREAT EXPERIENCE!...**N8GLS**. Very good condx on 20 and 15. Vast majority of QSOs S&P, was only able to run well on 20 Sunday 19Z...**N8II**. Had fun with limited time...**N8TCP**. Go MRRC GO!...**N8YXR**. Really no antenna...**N9GG**. Conditions were great except for the brick wall to JA on the low bands...**N9RV**. No time to play Friday night, and only a little over an hour Saturday (XYLs 60th "B"day). So decided to put my efforts into a SB 15M operation. Conditions not bad for the bottom of the sun spot cycle. But still tough for low power and low antenna. S&Pd my way through 15m Sunday, watching the spots and listening for new calls to work. Spent way to much time in the pileup for FR4QT for two new mults. I'm guessing I burned a good 45 minutes or more calling, but finally did get him in the log. I was hoping for some JA and other Pacific to pop up late in the day Sunday, but prop from that part of the world never materialized. I was able to get A31MM and one ZL in the log, and a few KH6, but prop to Pacific was light with some deep QSB. Atmosperic noise (noise floor) in that direction 240 - 320 degrees was 10 to 15 DB higher than to EU and SA most of the day. Was hoping for DXCC, but was not meant to be. Still had fun. Not too bad for the sun spot bottom. N9TF Rig, Elecraft K3s 100W to 2-el. triband at 37'. 73 Gene...**N9TF**. First

time running this contest. Only worked on Sunday. Had a great time...**N9UDO**. Part Time effort, S&P only...**N9VPV**. Another great CQ contest. Had a power outage Sat. afternoon. 73...**NC4MI**. I only had a few hours on Sunday afternoon so tried to make the best of it...**ND0C**. Got a few hours in after getting back from our annual vacation to the Epcot International Food and Wine Festival. 100% S&P...**NF4A**. Fun test! Decided to just try 40M and really enjoyed it! Hunting and pouncing produced some good DX and then worked the Antarctic station who gave me Zone 39 and a weather report of -44 degrees F. LOL...**NF7E**. My highest contest score ever!...**NK8Q**. Only a very part time effort due to family and work schedules. Decided to do single-band 80M and try to raise my DXCC totals on 80. Rig - Flex 6500. Antenna - Inverted L (35 up and 35 over) with one poor radial. Not a great antenna system, but I made a few contacts...**NM9P**. Always a lot of fun. Very busy weekend so just a little operating time...**NN2NN**. Many thanks to John, N3HBX for use of his awesome station!...**NN3W**. Post Hurricane Irma, I'm without my 40M Moxon. All of my rotating antennas slipped in their rotors, and don't point in the correct direction. I haven't been able to get up the towers to fix them. I've also picked up some hellacious QRN, but it only started the week before the contest. So, good thing I only ever planning on playing around...**NN4X**. 03-02-2016...**NQ5M**. Remote operation...**NR3X**. Great Contest! Thanks to all who worked to make this a successful contest...**NT4Z**. Paper log entered by VE3EJ...**NY0T**. Family-first, holiday-style, great conditions, thanks to all for the QSOs...**NZ3O**. No ten, but 15M was better than expected...**W0CP**. ROOKIE 04/2016...**W0DDP**. Paper log typed by VE3EJ...**W0PPF**. Fun contest even worked a few on 10M. 73 John...**W0YJT**. First licensed July 17, 2015 as KC1EDI...**W1AKI**. ROOKIE...**W1FOY**. One antenna for all bands: wire, 70 ft (21m) long and 30 ft (9m) high...**W1HIS**. 8-23-16...**W1MKW**. Thank you for sponsoring the contest. It was a fun weekend on the radio...**W1QK**. Major fundraiser for Kitty Quarters cat rescue took precedent...**W1RM**. Various family affairs won out except for a few hours...**W1VEM**. I'm not an SSB guy, so I started out just "giving out points," but I got hooked, and had a low-key, but enjoyable time. Not a big score, but a fun time, nevertheless. TNX to all those worked...**W2AAB**. Please tell me what I have won...**W2PIP**. ROOKIE Thank you!...**W2XK**. Date of first License 02-17-2017...**W3JRD**. This is my 1st contest. Thank you...**W3LES**. Fun!...**W3MMM**. A3S and A4S on the ground undergoing repair/upgrades. Gain antennas limited to 15-4CD. Great condx on 15M...**W3SM**. Licensed March 2016...**W3XOX**. Antennas were way too low. Going up next weekend. Fun contest anyway...**W3ZR**. MY SECOND CONTEST. NOT SURE ABOUT SCORING. DID THE BEST I COULD. THANKS! HAD A GREAT TIME!...**W4CWM**. Some new antennas gave additional options, thanks to my antenna party crew...**W4EEY**. IC-7300...**W4GHV**. Date First Licensed: January 30 2015. 73...**W4LID**. Run 'em...**W4ML**. Rookie attempt. General license granted 08/30/2017...**W4POT**. Operator/computer error limited my activity...**W4WNT**. Best fun was on 75M Europe, Africa, Hawaii, S America...**W5CO**. Nice to hear 15M open so well. Great fun in the greatest contest...**W5KU**. New email address the first was rejected by you from the other email...**W5YBT**. Licensed in 2015...**W5YYA**. Thanks for all the QSOs...**W6JCW**. Check Log only...**W6JJY**. No VK nor ZL on 20M, only one ZS!...**W6KW**. KK6QKQ Granted 11/19/14...**W6MOB**. This is my first ever contest submission. Licensed in 2017...**W6NYA**. Sorry I had trouble converting to Cabrillo from ADIF. Thanks for the help!...**W6OLA**. Conditions were tough from start to finish, especially for QRP!...**W6QU**. I have not looked at DX Contest rules since I was K2IEG in NY back in the 1960s. Therefore, my aim was not to enter the contest per se, but merely to work a few new countries under this (W6RBC) callsign. I had no way to calculate a score easily, or I would have done so.

Thanks. Barry...**W6RBC**. My first contest submission, enjoyed hearing lots of DX. Many more than heard me!...**W6RJM**. Only had Tri-band antenna up this year...**W7CAR**. Fun...**W7MEM**. Checklog...**W7WVF**. 40M dipole @ 20 ft 500W...**W7ZCU**. I hope this entered info assists in verifying contacts...**W8DFW**. Case Western Reserve University's club station...**W8EDU**. Condx were not great but lots of stations on the air...**W9GT**. Is Classic overlay 24 total hours or 24 contiguous hours?...**W9GYK**. Great to be in SSB contest again, no beep, beep, beep...**W9IIX**. A whole lot more fun then last year. Started slow but finished with a big bang!...**W9RE**. Just a bunch of alligators...**W9WB**. Always good to work the world!...**W9YK**. CABRILLO IS CONFUSING. I DID THE BEST I COULD. THE BEST I AM GOING TO DO. SO IF SOMETHING IS WRONG, PLEASE FIX IT. ADDITIONALLY, I REALIZE I SHOULD HAVE SENT THIS IN DAYS AND DAYS AGO, BUT I KNEW I WOULD NOT WIN ANYTHING ANYWAY. SO, THIS IS BEING SENT NOW, AT YOUR REQUEST. CONSIDERING ALL THE TIME I PUT INTO CABRILLOIZATION, I FIGURE I DESERVE A CERTIFICATE. 73...**WAØILD**. I rarely operate phone, so thought I would try something diferent. Wow 40M using SSB is tough work! Still glad I was here. 2-el. at 70

ft...**WA1FCN**. Made QSOs on 160, 80, 40, 20, and 15M. Inverted L, and kt-34...**WA2ALY**. Computer problems started causing the wrong band and freq data to be entered so I gave up before the end of the contest. Better luck next year I guess...**WA2BFW**. Better condx than last year Love doing this contest...**WA2QAU**. See 3830.com...**WA3AER**. Vertical Antenna...**WA3DMD**. THANKS TO THE OPERATORS AT V26B AND AT PJ4Q FOR THE 6 BANDS...**WA3EKL**. First CQ DX SSB Contest. Lots to learn. Sorry about being late with the log...**WA3YNF**. Paper log typed by VE3EJ...**WA4HXC**. Not as much time due to family activites. Conditions better than last year. Thanks for contacts and looking forward to 10M next year...**WA5WFE**. My great grandson was born on Sunday! Still finished the contest. hihi...**WA6KHK**. Operated remote from Tokyo, Japan...**WA6URY**. Fun! Heard 45 unique countries on my 15W and a wire...**WA7CPA**. Licensed in 2017...**WA7JBM**. Sore throat start, no voice keyer. Really like my RF-Kits Amp!...**WA8Y**. Special thanks to W2YC for the use of his superb contest station...**WB2P**. We had fun!...**WK1DS**. Rookie 09-15-2016...**WM4CH**. Awesome team! Stayed with it to the end...**WW4LL**.
